**Attachments:** W0296-01 App Attach.pdf

19 April, 2017

**W0296 - 01**

Dear Sir/Madam,

In accordance with Article 18(1) of the Waste Management (Licensing) Regulations, I am to inform you of the receipt on 18 April, 2017, of documentation relating to a waste licence application from Kilsaran Concrete in relation to a facility/premises located at Kilsaran Concrete Tullykane, Kilmessan, County Meath. This application has been assigned register number W0296 - 01. Further details in relation to the application are supplied on the accompanying attachment.

I am to advise you that any person may make a submission to the Agency, in writing, in respect of the application, pursuant to Article 15 of the Regulations, which provides as follows:

**Extract from the Waste Management (Licensing) Regulations**

**Submissions to the Agency regarding applications.**

15. For the purpose of Section 40(2)(b) of the Acts, a person may make a written submission to the Agency in relation to -
- (i) an application, and
  - (ii) such plans, documents and other information and particulars, including an environmental impact statement, as are submitted by the applicant in accordance with Articles 12, 13, 14 and 16,
- and the Agency shall not give notice of a proposed decision under Section 42(2) of the Acts before the expiry of a period of one month following the date of a relevant -
- (a) acknowledgement in accordance with Article 14(2)(a), or
  - (b) notice in accordance with Article 16(2)(a), or
  - (c) acknowledgement in accordance with Article 16(4),
- whichever such date is the later.

The application, (EIS if relevant) and associated correspondence, including the acknowledgements and notifications referred to in Article 15, are available to view on the Agency Website at [www.epa.ie/licensing](http://www.epa.ie/licensing).

The Agency will have regard to any submission made in accordance with the Regulations and will write, in due course, to each person who makes such a submission, to advise them of the Agency's proposed decision on the application.

In accordance with Article 22(1)(b) of the Waste Management (Licensing) Regulations, the Agency will write to you to inform you of its proposed decision on the application in due course.

**If you have no comments to make in relation to this application, there is no requirement for you to reply to this email.**

Yours sincerely,

Environmental Licensing Programme  
Office of Environmental Sustainability

An Ghníomhaireacht um Chaomhnú Comhshaoil

## Waste Management Licensing

Details of Waste Licence Application, in accordance with Article 18(2) of the Waste Management (Licensing) Regulations, as of 19 April 2017.

**Application Reference/ Register No.:** W0296-01

**Applicant Name/ Address:**

Kilsaran Concrete  
Piercetown  
Dunboyne  
County Meath

**Name & Location of Facility/ Premises concerned:**

Kilsaran Concrete, Tullykane,  
Kilmessan, County Meath,

**National grid reference of facility/ Premises**

689895 756969

**Note:** The class or classes of activity concerned in this application are detailed on the reverse.

**re: Waste Licence Application Reg No: W0296-01, made by Kilsaran Concrete, Piercetown, Dunboyne, County Meath, in respect of a facility/ premises at Tullykane, Kilmessan, County Meath. The class or classes of activity concerned in the above referenced waste licence application as of 19 April 2017, in accordance with the Third and Fourth Schedules to the Waste Management Act 1996 as amended, are as follows (see the description of these activities below):**

*Third Schedule Class/es: 15/*

*Fourth Schedule Class/es: 3, 4, 5, 12, 13/*

The applicant has specified the following as the principal activity: R.5/

<b>THIRD SCHEDULE</b>	
<b>Waste Disposal Activities</b>	
<u>D 1</u>	Deposit into or on to land (e.g. landfill, etc.)
<u>D 2</u>	Land treatment (e.g. biodegradation of liquid or sludgy discards in soils, etc.)
<u>D 3</u>	Deep injection (e.g. injection of pumpable discards into wells, salt domes or naturally occurring repositories, etc.)
<u>D 4</u>	Surface impoundment (e.g. placement of liquid or sludgy discards into pits, ponds or lagoons, etc.)
<u>D 5</u>	Specially engineered landfill (e.g. placement into lined discrete cells which are capped and isolated from one another and the environment, etc.)
<u>D 6</u>	Release into a water body except seas/oceans
<u>D 7</u>	Release to seas/oceans including sea-bed insertion
<u>D 8</u>	Biological treatment not specified elsewhere in this Schedule which results in final compounds or mixtures which are discarded by means of any of the operations numbered D 1 to D 12
<u>D 9</u>	Physico-chemical treatment not specified elsewhere in this Schedule which results in final compounds or mixtures which are discarded by means of any of the operations numbered D 1 to D 12 (e.g. evaporation, drying, calcination, etc.)
<u>D 10</u>	Incineration on land
<u>D 11</u>	Incineration at sea (this operation is prohibited by EU legislation and international conventions)
<u>D 12</u>	Permanent storage (e.g. emplacement of containers in a mine, etc.)
<u>D 13</u>	Blending or mixing prior to submission to any of the operations numbered D 1 to D 12 (if there is not other D code appropriate, this can include preliminary operations prior to disposal including pre-processing such as, amongst others, sorting, crushing, compacting, pelletising, drying, shredding, conditioning or separating prior to submission to any of the operations numbered D1 to D12)
<u>D 14</u>	Repackaging prior to submission to any of the operations numbered D 1 to D 13
<u>D 15</u>	Storage pending any of the operations numbered D 1 to D 14 (excluding temporary storage (being preliminary storage according to the definition of 'collection' in section 5(1)), pending collection, on the site where the waste is produced).
<b>FOURTH SCHEDULE</b>	
<b>Waste Recovery Activities</b>	

R 1 Use principally as a fuel or other means to generate energy: This includes incineration facilities dedicated to the processing of municipal solid waste only where their energy efficiency is equal to or above -

- 0.60 for installations in operation and permitted in accordance with applicable Community acts before 1 January 2009,

- 0.65 for installations permitted after 31 December 2008,

using the following formula, applied in accordance with the reference document on Best Available Techniques for Waste Incineration:

$$\text{Energy efficiency} = (E_p - (E_f + E_i)) / (0.97 \times (E_w + E_f))$$

where –

‘E<sub>p</sub>’ means annual energy produced as heat or electricity calculated with energy in the form of electricity being multiplied by 2.6 and heat produced for commercial use multiplied by 1.1 (GJ/year),

‘E<sub>f</sub>’ means annual energy input to the system from fuels contributing to the production of steam (GJ/year),

‘E<sub>w</sub>’ means annual energy contained in the treated waste calculated using the net calorific value of the waste (GJ/year),

‘E<sub>i</sub>’ means annual energy imported excluding E<sub>w</sub> and E<sub>f</sub> (GJ/year),

‘0.97’ is a factor accounting for energy losses due to bottom ash and radiation.

R 2 Solvent reclamation/regeneration

R 3 Recycling/reclamation of organic substances which are not used as solvents (including composting and other biological transformation processes), which includes gasification and pyrolysis using the components as chemicals

R 4 Recycling/reclamation of metals and metal compounds

R 5 Recycling/reclamation of other inorganic materials, which includes soil cleaning resulting in recovery of the soil and recycling of inorganic construction materials

R 6 Regeneration of acids or bases

R 7 Recovery of components used for pollution abatement

R 8 Recovery of components from catalysts

R 9 Oil re-refining or other reuses of oil

R 10 Land treatment resulting in benefit to agriculture or ecological improvement

R 11 Use of waste obtained from any of the operations numbered R 1 to R 10

R 12 Exchange of waste for submission to any of the operations numbered R 1 to R 11 (if there is no other R code appropriate, this can include preliminary operations prior to recovery including pre-processing such as, amongst others, dismantling, sorting, crushing, compacting, pelletising, drying, shredding, conditioning, repackaging, separating, blending or mixing prior to submission to any of the operations numbered R1 to R11)

R 13 Storage of waste pending any of the operations numbered R 1 to R 12 (excluding temporary storage (being preliminary storage according to the definition of ‘collection’ in section 5(1)), pending collection, on the site where the waste is produced)”

1. The first part of the document discusses the importance of maintaining accurate records of all transactions. It emphasizes that proper record-keeping is essential for the integrity of the financial system and for the ability to detect and prevent fraud. The text notes that without reliable records, it would be difficult to track the flow of funds and to identify any irregularities.

2. The second part of the document outlines the specific procedures for recording transactions. It details the steps involved in the accounting process, from the initial recording of a transaction to the final posting to the general ledger. The text stresses the need for consistency and accuracy in these procedures to ensure that the financial statements are reliable and free from error.

3. The third part of the document addresses the role of internal controls in the accounting process. It explains how internal controls are designed to prevent and detect errors and fraud, and how they contribute to the overall effectiveness of the financial system. The text highlights the importance of a strong internal control environment and the need for regular monitoring and evaluation of these controls.

4. The fourth part of the document discusses the impact of technology on the accounting process. It notes that the use of computerized accounting systems has significantly improved the efficiency and accuracy of financial reporting. However, it also points out that the use of technology has introduced new risks, such as data security and system failures, which must be carefully managed.

5. The fifth part of the document concludes by summarizing the key points discussed and emphasizing the importance of a commitment to high standards of accounting practice. It states that only through a combination of accurate record-keeping, strict internal controls, and the effective use of technology can the financial system be maintained in a state of integrity and reliability.
