

## Attachment H.1 Raw Materials, Intermediates and Product Handling

Diesel and gas oil are stored in above ground tanks (59,000 litres and 14,000 litres respectively) in dedicated structure at the eastern boundary, close to Building 1. The tanks are provided with individual bunds, each of which has a minimum capacity of 110% of the volume of the tank. The bunds are subject to routine integrity testing, as required by the Licence conditions and are structurally sound.

Adblu, a diesel additive, is stored in a 1,000 litre IBC which is bunded and located adjacent to the oil bunds. The maximum amount of fuel and Adblu stored on site at any one time are shown in the table below:

### Raw Materials

Products	Quantity Stored litres
Diesel Oil	59,000
Gas Oil	14,000
Adblu	900
