

Licence Alteration Request

Alteration Details	
Licence	W0167-03 Indaver Ireland Limited (Duleek)
Licensee	Indaver Ireland Limited
Title of Alteration	Addition of 19 02 08* and change to max. mass flow per annum in Schedule A2

Screening Report

No.	Question	Answer
1	Does the proposed alteration require a new class of activity or process?	No
2	Does the proposed alteration cause a new / additional main emission point?	No
3	Does the proposed alteration increase or change specified emissions significantly ?	No
4	Does the proposed alteration increase significantly the overall total emission from the installation/facility?	No
5	Does the proposed alteration involve development or proposed development that has already been granted planning permission or requires a grant of planning permission and was/is subject to EIA by the Planning Authority or An Bord Pleanála?	No
6	Did the proposed alteration require the preparation of a Natura Impact Statement (NIS) for consideration by any Planning or Public Authority?	No
7	Does the proposed alteration indicate that the EPA should conduct an Appropriate Assessment (on foot of a screening for Appropriate Assessment)?	No
8	Does the proposed change conflict with BAT as set out in the relevant BAT Conclusions? See here	No
9	Does the proposed alteration adversely affect the energy efficiency of the installation/facility?	No
10	Does the proposed alteration adversely affect the environmental risk of the installation/facility significantly ?	No

Licence Alteration Request

11	Does the proposed alteration cause an increase above the capacity limitations specified in the licence?	No
12	Does the proposed alteration require an extension of operating hours (where controlled by the licence) for an installation/facility where the public is likely to have an interest in such an extension?	No
13	Does the proposed alteration involve the incineration or co-incineration of waste materials displaying hazardous properties that were not previously authorised (as per the WID/IED)?	No
14	Does the proposed alteration introduce materials or techniques which adversely alter the probability, magnitude and duration or complexity of the site transboundary impact?	No
15	Does the proposed alteration constitute a substantial change?	No
16	Does the proposed alteration require a change to a condition or schedule of the Licence?	Yes

Recommendation

Based on your responses to the forgoing questions the recommended option is for you to submit a 'Request Licence Amendment' for this proposed alteration.

To submit this request to the EPA you should locate it in the 'Request Alteration' area in LMA. Click on 'Proceed' against this saved request, and then click on the 'Request Licence Amendment' button (in STEP 2 of the process). Then you will be required to provide more detailed information about your proposed amendment.

Note: The responses you have provided in this Screening Report will form part of the information record if you decide to proceed with this alteration request.

Recommendation Date: 21/10/2016

Clerical or Technical Amendment Application Details

Proposed Alteration Description

Indaver Ireland have a solvent recovery facility at Dublin Port(W0036-02) which primarily produces liquid solvent fuel for the cement industry. Another type of waste that is produced from this facility is an aqueous waste stream. This is currently exported to Europe for treatment. This waste stream could be treated at our facility in Duleek, W0167-03.

The EWC code that the aqueous liquid waste stream is given from the facility in Dublin port is 19 02 08*. This licence, W0167-03, does not have 19 02 08* present in Schedule A2 and therefore we currently cannot accept it. Because of the amount of liquid waste that could be produced and treated we also require a change to the max mass flow per annum. We are requesting the mass flow to be changed from 8000T/annum to 10,000T/annum. The overall maximum tonnes per annum for acceptance to the site will not change. This will help to make Ireland more self sufficient in treating it's own waste on the Island of Ireland.

Priority	3. Urgent
Category of Amendment	(b) Facilitating the doing of any thing pursuant to a condition attached to the licence where the doing of that thing may reasonably be regarded as having been contemplated by the terms of the condition or the terms of the licence taken as a whole but which was not expressly provided for in the condition

Licence Condition Changes

Condition / Schedule Reference	Current Condition / Schedule Wording	Suggested New Wording
A.2	Schedule A.2 Currently states: Aqueous Wastes 07 01 01*, 07 05 01*, maximum mass flow (tonnes per annum) 8,000. Min calorific value 0, max calorific value 12	Schedule A.2 Aqueous Wastes 07 01 01*, 07 05 01*, 19 02 08*, maximum mass flow (tonnes per annum) 10,000. Min calorific value 0, max calorific value 12

Questions

Q1	Is planning permission required to support the proposed alteration?	No
Q2	Does the application involve an installation boundary change?	No
Q3	Does the application involve changes to emissions to sewer?	No
Q4	Attach Appropriate Assessment Screening Report here	Appropriate Assessment Screening Report.pdf
