Recommendation

Based on your responses to the forgoing questions the recommended option is for you to submit a 'Licence Review' application for this proposed alteration.

To progress this request you are required to go to the EPA website (www.epa.ie), complete the relevant Licence Application Form and follow the licensing application process. The application should be submitted to the EPA as specified in the licence application form or any associated instructions for applicants.

Clerical or Technical Amendment Application Details

Proposed Alteration Description

Amend Schedule C (Emission Limits) and Schedule D (Monitoring) of the Waste Licence to include the proposed emission point A1-1 from installation of an Odour Abatement System and associated stack. The proposed odour abatement system will treat odourous air from the Municipal Waste Processing Building (MWPB) and discharge the treated air through a new suitably sized stack (A1-1); Oxigen propose to trial a pilot plant bio-scrubber odour abatement system at their facility in Coes Road in order to optimise the scrubber settings. Oxigen require Agency approval to commission the trial system in advance of the emission point being formally approved through the licence review process; Oxigen are also considering a carbon-based odour abatement system as proposed by the EPA during a meeting held with Oxigen on 21st December 2016. Both the bio-scrubber and carbon-based odour abatement system options are assessed within this Technical Amendment application.

Priority	3. Urgent
Category of Amendment	(c) Otherwise facilitating the operation of the licence (or certificate) and the making of the amendment does not result in the relevant requirements of section 83(5) of the EPA Act as amended/ section 42B(1) of the Waste Management Act as amended/environmental requirements ceasing to be satisfied
