# MR. ANTONE KIERNAN

# LICENCE REG. NO. P0382-01

# ANNUAL ENVIRONMENTAL REPORT (A.E.R.)

# 1<sup>ST</sup> JANUARY 2016 – 31<sup>st</sup> DECEMBER 2016

### I. PREFACE

This report is provided to comply with Condition No. 2.4.2 of the Industrial Emissions Licence (Reg. No. P0382-01) issued to Mr Antone Kiernan This condition is as follows;

"The licensee shall submit to the Agency, eighteen months from the date of grant of this licence, and each calendar year by 1 November thereafter, an AER which shall be to the satisfaction of the Agency. This report shall include as a minimum the information specified in Schedule 5(i) Recording & Reporting to the Agency and shall be prepared in accordance with any relevant guidelines issued by the Agency."

In January 2012 the EPA produced a Draft Guidance Document 'Annual Environmental Report: Standardised Reporting Guidance' together with an accompanying template for a standardised AER Report for IPPC (and Waste) licensed facilities. This standardised the submission date for AER's to 31st March of each year. This AER has been prepared in accordance with this draft guidance and in line with the standardised reporting format outlined in this document. As such the template as updated in January 2013 for summary emissions and licence specific reports has been completed for this site and is included in this Report. As requested in the guidance document this report includes only the summary information requested and all other associated documentation has been retained on site and is available for inspection if required.

# II. REPORT CONTENT

In line with the *Standardised Reporting Guidance* this AER contains the following summary information.

- 1. Facility Summary Information
- 2. Air Emissions
- 3. Water
- 4. Bund Test (Intensive Agriculture)
- 5. Complaints Incidents
- 6. Groundwater
- 7. Resource & Energy Use
- 8. Waste

Attachment A PRTR Workbook & Emissions Calculation Sheet

Facility Information Summ	ary
AER Reporting Year	2016
Licence Register Number	P0382-01
Name of site	Mr. Anton Kiernan
Site Location	Carrowcushcly, Ballymote, Co. Sligo
NACE Code	0146
	The rearing of pigs in an installation, whether within the same complex or within
	100 metres of the same complex, where the capacity exceeds 285 places for sows
Class of Activity	in an integrated unit and 2,000 places for production pigs.
National Grid Reference (6E, 6 N)	-8.53382 54.1230
A brief description of the activities/process at the site for the reporting year. This should include information such as production increases or decreases on site, any infrastructural changes, environmental performance improvements which were measured during the reporting year;	Pig Unit with capacity for 592 sows.
Stock numbers-please enter <b>average</b> stock numbers and stock type e.g. Suckling sow+litter, Dry sow, Boars, Maiden gilts, Weaners, Finishers, broiler,layer,duck	As per PRTR Returns
Please state date of last stock count	01/01/2016 - 31/12/2016
Please enter stock numbers and type at last count  Declaration:	As per average numbers

### Declaration:

All the data and information presented in this report has been provided by the Licensee. The information is presented to meet

Signature Date
Consultant
(or nominated, suitably qualified and experienced deputy)

Organic fertiliser storage capacity	Lie No:	P0382-01	Year:	2016

Please complete the table using the explanation of entries below as a guide

Table OFS.1 Storage capacity for Organic Fertiliser

Type of Organic Fertiliser	Total organic fertiliser storage capacity (m3)	Opening Quantity of organic fertiliser (1 <sup>st</sup> January of reporting year)	of organic fertiliser (1 <sup>st</sup> January of	site in reporting year (Organic Fertiliser & Estimated production based on organic	Total quantity of organic fertiliser moved off site in reporting year (as recorded in the organic fertiliser register and "record 3" as submitted to DAFM*)	Where there is a difference between the amount moved off site (record 3 amount) and the amount generated (taking into account opening and closing amounts) provide details to account for this difference, e.g. applying organic fertiliser to Licencee's farmland.	Have records of movement of organic fertiliser (record 3) for the reporting year been submitted to DAFM?
Pig Slurry	10927	6967	8210	8237	7154	Negligible Difference	Yes

<sup>\*</sup>DAFM -Department of Agriculture Food and Marine

Column a The total organic fertiliser storage capacity is calculated by summing storage capacity onsite. If applicable, Agency agreed off-site storage should be added to the total on-site.

Column b This is the opening quantity of organic fertiliser recorded on 1st of January of AER reporting year

Column C This is the quantity of organic fertiliser at close of reporting year calculated by recording the opening quantity on 1st January of the current calendar year

Column d This is the quantity of organic fertiliser generated by the animals housed on site in the AER reporting year

Column e Total quantity of organic fertiliser moved off site and recorded in the organic fertiliser register and "record 3" as submitted to DAFM\* in AER reporting year

Column **f** If there is a difference between the amount recorded in the Record 3 form submitted (**e**) and the amount recorded by adding together the opening quantity (**b**) and amount generated (**d**) and substracting the closing quantity (**c**) i.e. if **e** does not match **b** + **d** - **c**, account for the mistmatch, for example where the unit is applying organic fertiliser on their own landbank

# **Annual Environmental Report: Summary of Emissions and Waste Transfers**

# Intensive Agriculture Emissions Calculation Tool for AER / PRTR Reporting Version 1.1 May 2009

**Data Entry and Calculation Output Sheet** 

Facility Name: Mr. Anton Kiernan Licence Reg. No.: P0382-01 Reporting year: 2016

# Data Entry Table: Pig Farms

### Input (in the yellow boxes) the annual average number of animals

- · Note: the animal number for each class of swine (weaners; finishers; boars;etc) should be the average number in the facility over the 12 month period and should accord with your stocking register for the year.
- Stock counts on a monthly basis can be added and the total divided by 12 for each animal class.
- If stock counts are only available for lesser frequencies, i.e quarterly, then the average of these counts should be used to give the annual stock figures

### HOUSING Enter PIG NUMBERS in each class:

	data entry:
Class	Pig Number / year
Suckling sow+litter	108
Dry sow	462
Boars	3
Maiden gilts	36
Weaners (7 to 35 kg)	3,111
Finishers (35 to 98 kg)	2,701

### STORAGE Enter surface area of OUTDOOR UNCOVERED STORAGE (see Surface Area Calculation for a simple tool for this purpose)

	data entry:
Unit number	Surface Area m²
Slurry storage 1	0
Slurry storage 2	0
Slurry storage 3	0
Slurry storage 4	0
Others	0
Total	0

### **FORM OF MANURE STORAGE** Enter the form of Manure Storage data entry

Does the facility employ: Liquid Manure Storage: Solid Manure storage:

Enter Yes in

appropriate box:

YES

(Note: the default assumption is Liquid Storage)

## Data Output Table Pig Farms

- The following table provides the output data in the appropriate format for reporting via the "Releases to Air" Worksheet of the EPA Electronic AER Reporting Workbook
- The information must be entered manually; do NOT attempt to use the Cut or Copy methods for this task.
- All housing and storage emissions should be entered as Fugitive Emissions

	RELE	ASES TO AIR
