Subject: W0211-02 ERAS ECO Ltd - Notification
Date: 19 October 2017 11:29:00
Attachments: [W0211-02 Regulation 10.pdf](#)

Dear Mr Mullally,

The Agency issued a regulation 10 notification to you on the 17th October 2017.
Unfortunately we have noticed that the notification date states 7th June 2017 when it should
have read 17th October 2017.

I have attached a new Regulation 10 notification with the correct date for your files.

Sorry for any inconvenience caused.

Kind regards,

GRAINNE OGLESBY,

County Cork

17th October 2017

Dear Mr Mullally

I refer to your application for review of licence register number W0211-01 and response dated 21/08/2017 to Agency's correspondence of 2/06/2017.

I am to advise in accordance with Regulation 10(2)(b)(ii) of the EPA (Industrial Emissions) (Licencing) Regulations 2013, that the following information is required in support of the application under Regulation 9 of the Regulations:

1. Please refer to your application for review of licence register number W0211-01. The application contains several mentions of Ormonde Organics in the text. Please clarify.
2. The anaerobic digestion process description (literature) is markedly different from the process flow diagram contained in Attachment D, In the literature, references were made to the pasteurisation tanks and production of liquor.
 - a. Please show in the diagram at what stage pasteurisation takes place.
 - b. Please show in the diagram at what stage liquor is derived.
 - c. Please clarify why the ' fibre' is taken-in for 'sludge d1ying' in the schematic. Where is the sludge from?
 - d. Please clarify the process flow for the digestate - why is it going into the on-site WWTP?
3. It is stated in your response that odour complaints received in 2016 were traced to opening doors of buildings to receive materials. During my site visit on 15 October 2017, I was informed that materials discharging from trucks may take up to 30 minutes to complete. Provide detailed measures to be taken (including provision for negative pressure) to isolate and prevent odour from these (door) sources during the receipt of materials.

In addition to the above please also provide an updated non-technical summary to reflect the information provided in your reply.

The requested information should be submitted to the Agency within *four weeks* of the date of this notice, in order to allow the Agency to process and determine your application.

In the circumstances, you should make immediate arrangements to have the required document(s) (signed original and 1 copy in hardcopy format, and 2 copies of all files in electronic searchable PDF format on CD-ROM) submitted to the Agency without delay. Your response to this request should be directed to Grainne Oglesby, Administration Officer, Office of Climate, Licensing & Resource use.

It should be noted that the eight-week period within which the Agency is to decide the proposed determination will commence on the day on which this notice has been complied with. If you have any further queries please contact Dr Magnus Amajirionwu at the number above.

Yours sincerely

Dr. Magnus Amajirionwu
