1st November 2017

Director of Services, Planning,

Meath County Council,

County Hall,

Co. Meath.

Navan,

Reg. No. W0265-01

Notification under Section 42(11)(e)(iii)of the Waste Management Act 1996 as amended (The Act).

Dear Director of Services, Planning

I refer to our previous notification to you dated 21st September 2016 regarding the licence application made by Clashford Recovery Facility Limited in respect of a facility located at Naul, Co. Meath, licence application register number W0265-01.

It is noted that a response to our notification of 21st September 2016 remains outstanding.

In accordance with Section 42(1I)(e)(iii) of the Act, you are asked to address the following matters and submit relevant information:

1. Your letter dated 16th October 2017, reference 69265, is noted. Given the need for EIA for the activity the subject of the waste licence application, the EPA cannot consider whether to grant a licence to the Clashford Recovery Facility Ltd except where there is planning permission in place for the activity described in the licence application.

Please state whether there is planning permission in place for the following proposed and partially completed activities:

- restoration of the quarry using waste soil and stone within the boundaries the subject of the waste licence application; and
- treatment, recovery and recycling of construction and demolition waste at the facility, as proposed in the waste licence application. [Please note this proposed activity does not involve the deposit of construction and demolition waste].

Please provide a copy of relevant planning permissions. Please also provide a copy of relevant planning inspectors' reports.

If it is the case that there is no planning permission for these activities, or if there is any ambiguity regarding the presence of planning permission, we are likely to make a recommendation to refuse the licence application for some or all of the proposed activities.

2. Attached is a drawing (Drawing 1) provided to the EPA by the applicant on 18th October 2017. The drawing purports to represent an outline of the waste activity authorised under waste facility permit reference number WMP 2005/1.

Please confirm whether the drawing in fact represents the area of the waste activity authorised by waste facility permit reference number WMP 2005/1.

It is noted that correspondence from Meath County Council received on 23^{rd} October 2015 refers to waste facility permits with different reference numbers: WMP 2005/13 and WMP 2005/25. Please submit a drawing which represents the areas of these waste facility permits and any other waste facility permits as the case might be.

3. Please provide additional commentary on the above matters or other matters that you consider are relevant to the EPA's decision-making on this licence application.

A copy of the application submitted by the applicant and associated correspondence are available for inspection by you on the Agency's website <u>www.epa.ie</u>.

You are requested to respond to the Agency within 4 weeks of receipt of this notice and furnish any observations your authority has in relation to the licence application.

Where it is intended to submit additional documentation with your observations, it would be much appreciated if you could include an electronic copy of all documents in pdf format on a CD ROM in order to facilitate the publishing of your observations and attachments to the Agency's website.

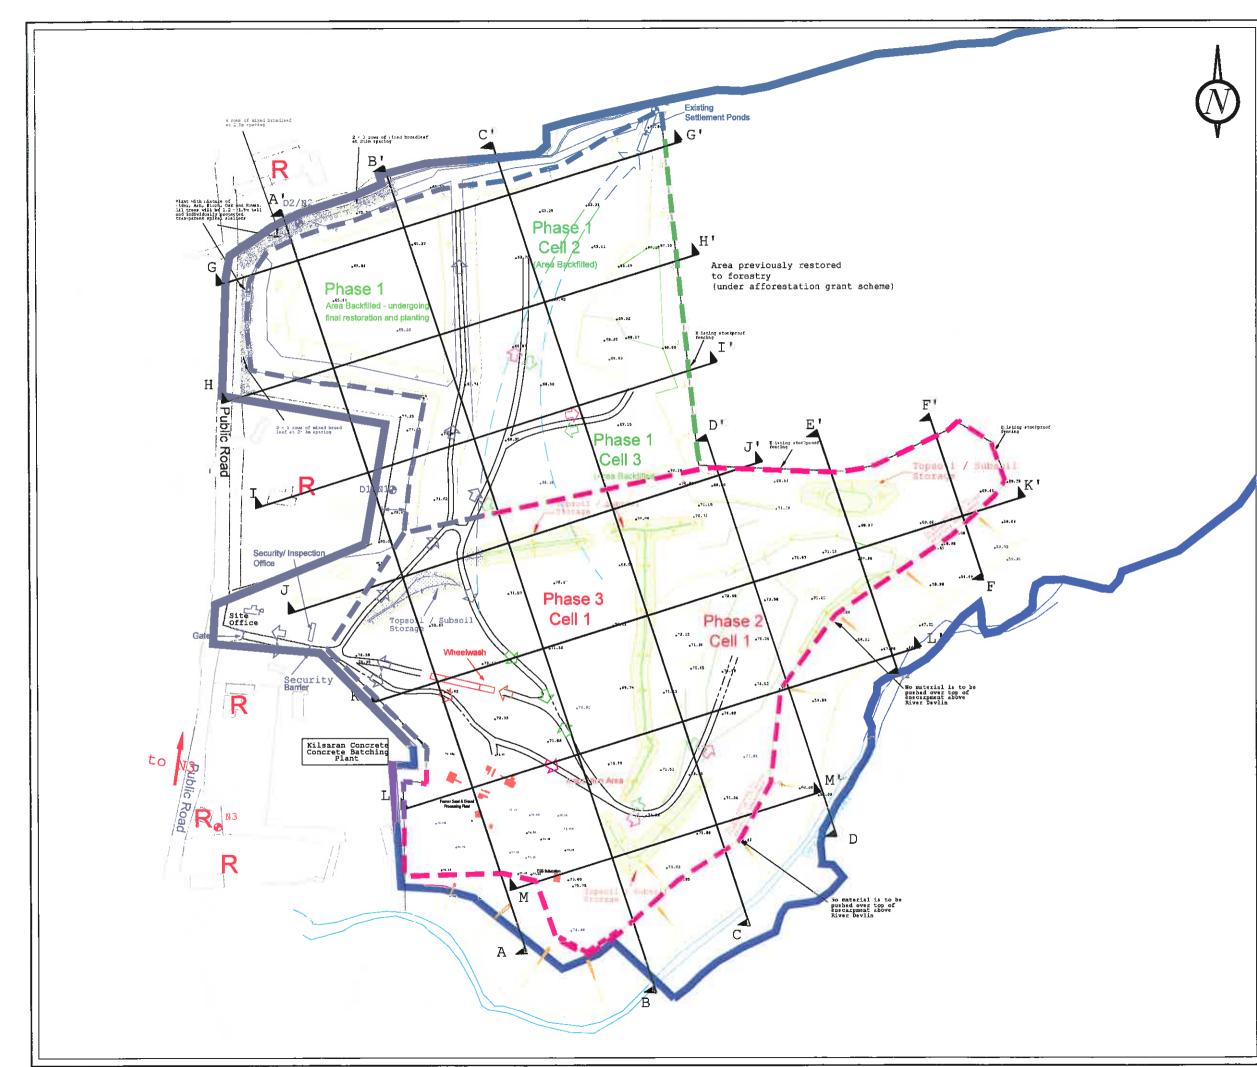

The application is being processed by the Agency and your observations, if any, will be considered as part of the licence application assessment process. You will be notified of the proposed decision in due course.

Yours sincerely,

Éwa Babiarczyk Inspector Environmental Licensing Programme Office of Environmental Sustainability

Encl. Drawing 1.

Copied to: Director of Services, Environment, Meath County Council.
