## Appropriate Assessment Screening Determination

In accordance with Regulation 42(1) of the European Communities (Birds and Natural Habitats) Regulations 2011 as amended, the Agency has undertaken Appropriate Assessment screening to assess, in view of best scientific knowledge and the conservation objectives of the site, if the activity, individually or in combination with other plans or projects is likely to have a significant effect on a European Sites. In this context, particular attention was paid to the European Sites listed below.

## Consent Details:

Reg. No.	P0465-01
Applicant Name:	G.Bruss GmbH DICHTUNGTECHNIK
Type of Consent Sought:	IPC licence
Location of Installation:	Finisklin Road, Sligo.
Licence Application Date:	09 October 2014
European Site(s) assessed:	Lough Gill SAC (Site Code: 001976)
	Cumeen Strand/Drumcliffe Bay SAC (Site Code: 000627)
	Cumeen Strand SPA (Site Code: 004035)
Date of AA Screening Determination:	03 January 2018

## AA Screening Determination:

That the activity is not directly connected with or necessary to the management of any European site and that it can be excluded, on the basis of objective information, that the activity, individually or in combination with other plans or projects, will have a significant effect on any European site and accordingly determined that an Appropriate Assessment of the activity was not required.

This determination was made in light of the scale and nature of emissions to the environment; in particular the scale of the emissions to air from the installation; by virtue of the determined mass emissions, none of the emissions to air from the installation are considered to be significant. With regards to the hydrologically linked sites, it has been determined that the Sligo municipal WWTP has the capacity to sufficiently treat the effluent discharges from the activity; and that furthermore, there are no direct emissions to surface water or emissions groundwater from the installation. Precautionary infrastructural and procedural measures, specified in the application, are designed to prevent significant impacts occurring due to chemical spills or fire.
