Provide measures to reduce emissions  
(list techniques)

Maintenance on Equipment, Reduce number of fans running at night – Noise Mitigation measures are outlined in Chapter 9 of the Attached EIS.

Following the guidance populate the monitoring points and then the proposed sound limits in the table below.

Monitoring point code	Easting	Northing	Monitoring point type <sup>i</sup>	Proposed sound limits (dB)				Proposed monitoring frequency
				Max noise level daytime (30 mins)	Max noise level evening (30 mins)	Max noise level night (30 mins)	How was the sound limit derived? <sup>ii</sup>	
NSL	615299	634033	Noise Sensitive Location	55 dB LAeq	50 dB LAeq	45 dB LAeq	Licence Monitoring	Annual

For inspection purposes only.  
Consent of copyright owner required for any other use.

<sup>i</sup> Monitoring point type options: 'Boundary', 'Noise Sensitive Location' or 'Permanent Noise Monitoring'  
<sup>ii</sup> Derived sound limit options: 'EQS', 'BAT' or 'Derogation'
