Groundwater/Soil monitoring template Lic No: W0021-02 Year 2017

#### Comments

		Comments	
Are you required to carry out groundwater monitoring as part of your licence	wos		Please provide an interpretation of groundwater monitoring data in the
requirements?	yes		· · · · · · · · · · · · · · · · · · ·
2 Are you required to carry out soil monitoring as part of your licence requirements?  Do you extract groundwater for use on site? If yes please specify use in comment	no		interpretation box below or if you require additional space please
3 section			include a groundwater/contaminated land monitoring results
Section	no		interpretaion as an additional section in this AER
Do monitoring results show that groundwater generic			
assessment criteria such as GTVs or IGVs are exceeded or is			
4 there an upward trend in results for a substance? If yes, please			
complete the Groundwater Monitoring Guideline Template Groundwater			
Report (link in cell G8) and submit separately through ALDER as monitoring			
a licensee return AND answer questions 5-12 below. template	SELECT	GW report completed.	
·	SEEECI	GW report completed.	
5 Is the contamination related to operations at the facility (either current and/or			
historic)	yes		
6 Have actions been taken to address contamination issues?If yes please summarise		Cut-off wall installed and	
remediation strategies proposed/undertaken for the site	yes	wellpoint GW	
7		works complete,	
Please specify the proposed time frame for the remediation strategy	N/A	operations on-going	
o o			
Is there a licence condition to carry out/update ELRA for the site?	yes	Contained in GW report	
0			
Has any type of risk assesment been carried out for the site?	yes	Contained in GW report	There is a plume of contaminated GW in the downgradient area of the
10			site. This has been investigated on a number of occassions, including by
Has a Conceptual Site Model been developed for the site?	yes	Contained in GW report	geophysical survey, and relates to waste landfilled prior to licencing.
44			There has been a cut-off wall installed which effects the shallow wells.
Have potential receptors been identified on and off site?	yes	Contained in GW report	The plume is reducing both in size and concentration over time and will
		'	continue to be monitored as part of the aftercare associated with the
12 Is there evidence that contamination is migrating offsite?	yes	Contained in GW report	site. The groundwater assessment was submitted in 2016.
	/		site. The Broamanate. assessment was submitted in 2010.

please note exceedance of generic assessment criteria (GAC) such as a Groundwater Threshold Value (GTV) or an Interim Guideline Value (IGV) or an upward trend in results for a substance indicates that further interpretation of monitoring results is required. In addition to completing the above table, please complete the Groundwater Monitoring Guideline Template Report at the link provided and submit separately through ALDER as a licensee return or as otherwise instructed by the EPA.

<u>Groundwater monitoring template</u>

More information on the use of soil and groundwater standards/ generic assessment criteria (GAC) and risk assessment tools is available in the EPA published guidance (see the link in G31)

<u>Guidance on the Management of Contaminated Land and Groundwater at EPA Licensed Sites (EPA 2013).</u>

\*\*Depending on location of the site and proximity to other sensitive receptors alternative Receptor based Water Quality standards should be used in addition to the GTV e.g. if the site is close to surface water compare to Surface Water Environmental Quality Standards (SWEQS), If the site is close to a drinking water supply compare results to the Drinking Water Standards (DWS)

Number of Installations	1
Number of Operating Hours in Year	0
Number of Employees	5
	Site is operating as a CA site. No waste is accepted to landfill since closure in 2012. The landfill gas being experienced and utilised or flared at the site is much lower than that predicted by GASSIM and is decreasing. This is resulting in a higher emission calculation.
Web Address	

### 2. PRTR CLASS ACTIVITIES

Activity Number	Activity Name
5(d)	Landfills
5(c)	Installations for the disposal of non-hazardous waste
5(d)	Landfills
50.1	General

#### 3. SOLVENTS REGULATIONS (S.I. No. 543 of 2002)

,	,
Is it applicable?	
Have you been granted an exemption ?	
If applicable which activity class applies (as per	
Schedule 2 of the regulations) ?	
Is the reduction scheme compliance route being	
used ?	

### 4. WASTE IMPORTED/ACCEPTED ONTO SITE

### Guidance on waste imported/accepted onto site

Do you import/accept waste onto your site for on-	
site treatment (either recovery or disposal	
activities) ?	

This question is only applicable if you are an IPPC or Quarry site

#### Additional Data Requested from Landfill operators

For the purposes of the National Inventory on Greenhouse Gases, landfill operators are requested to provide summary data on landfill gas (Methans) flared or utilised on their facilities to accompany the fligures for total methane generated. Operators should only report their Net methane (CH4) emission to the environment under Thotal NgOy for Section A Sector specific PRTR pollutants above. Please complete the table below:

Link to previous years emissions data

#### Landfill: Derrinumera Landfill Facility

## A survey of landfill sites to determine the quantity of methane flared and or recovered in utilisation plants for 2017

Please choose from the drop down menu the license number for your site	W0021
Please choose from the drop down menu the name of the landfill site	Derrinumera Landfill Facility
Please enter the number of flares operational at your site in 2017	1
Please enter the number of engines operational at your site in 2017	1
Total methane flared	132,316 kg/year
Total methane utilised in engines	37,840 kg/year

#### Please note that the closing date for reciept of completed surveys is 31/03/2018

#### Introduction

The Office of Environmental Sustainability (OES) of the Environmental Protection Agency acts as the inventory agency in Ireland with responsibility for compiling and reporting national greenhouse gas inventories to the European Commission and the United Nations Framework Convention on Climate Change. In addition to meeting international commitments Ireland's national greenhouse gas inventory informs national agencies and Government departments as they face the challenge to curb emissions and meet Ireland's emission reduction targets under the Effort Sharing Decision (No. 406/2009/EC). The national inventory also informs data suppliers, making them aware of the importance of their contributions to the inventory process and a means of identifying areas where input data may be improved.

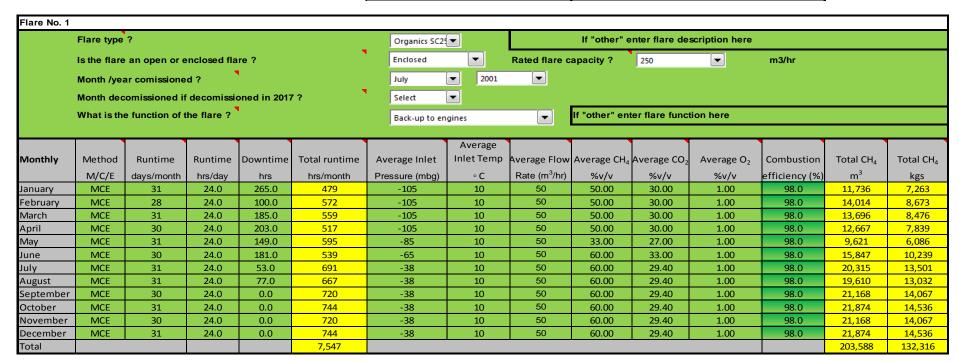

It is on this basis that the Environmental Protection Agency is asking landfill operators to partake in this survey so that the most uptodate information on methane flaring and recovery in utilisation plants at landfills sites is used in calculating the contribution of the landfill sector to national greenhouse gas emissions

The Environmental Protection Agency wishes to thank you for partaking in this survey. If you have any questions about the survey and how to complete it please view the "Help sheet" worksheet. If however, your query is not answered by viewing the "Help sheet" worksheet please contact:

LFGProject@epa.ie

Once completed please send the completed file as an attachment clearly stating the name and or license number of the landfill site (e.g. W000 Xanadu landfill\_2017) to: LFGProject@epa.ie

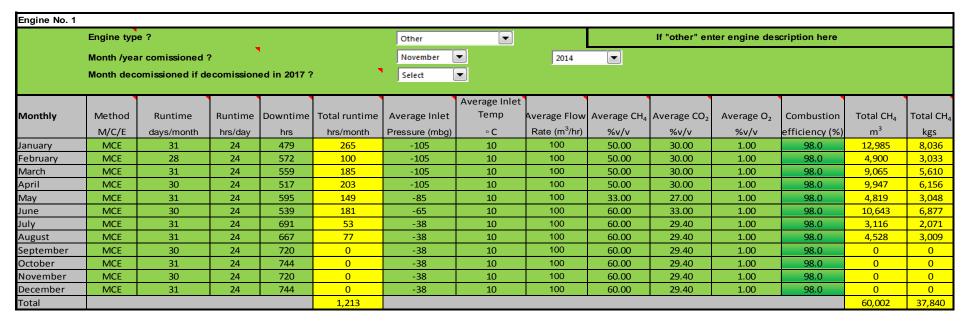

to be filled in by licensee calculated by spreadsheet

Please note: Only fill the "Yearly" table if data is not availabe or cannot be calculated nor estimated on a monthly basis
