#### 9 Environmental Management Techniques 1

#### 9.1. Accident Prevention Measures

#### Measures to prevent accidental emissions and liabilities

Incidents and accidents are unplanned events. Emissions from incidents and (major) accidents usually occur within a relatively short time frame but with greater intensity than under normal operating conditions. Incidents such as fire or fuel spillages can result in liabilities such as contaminated soil and groundwater. Proactive risk management reduces the potential for an incident.

Abnormal operating conditions must be managed without endangering human health and harming the environment, and in particular without risk to water, air, soil, plants or animals, without causing a nuisance through noise or odours, and without adversely affecting the countryside or places of special interest.

The applicant must firstly undertake a risk assessment in accordance with EPA guidance on assessing and string environmental liabilities. Having identified the key risks, the applicant should populate the following table with the measures to be taken to treat the key risks, e.g., which into the following table with the measures to be taken to treat the key risks, e.g., which is a second and the following table with the measures to be taken to treat the key risks, e.g., which is a second and the following table with the measures to be taken to treat the key risks, e.g., which is a second and the following table with the measures to be taken to treat the key risks, e.g., which is a second and the following table with the measures to be taken to treat the key risks, e.g., which is a second and the following table with the measures to be taken to treat the key risks, e.g., which is a second and the following table with the measures to be taken to treat the key risks, e.g., which is a second and the following table with the measures to be taken to treat the key risks, e.g., which is a second and the following table with the measures to be taken to treat the key risks, e.g., which is a second and the following table with the measures to be taken to treat the key risks, e.g., which is a second and the following table with the measures to be taken to treat the key risks, e.g., which is a second and the following table with the measures to be taken to the following table with the measures to be taken to the following table with the measures to be taken to the following table with the measures to be taken to the following table with the measures to be taken to the following table with the measures to be taken to the following table with the following table with the measures to be taken to the following table with the measures to be taken to the following table with the measures to be taken to the following table with the measures to the following table with the measures to the following table with the measures to the fol

The range of measures is dependent on the complexity of the site. Pollution prevention measures may, inter alia, include the following information:

- Conclusions on BAT set out in the EU Reference document on BAT on emissions from storage such as a safety management system; corrosion prevention measures on tanks, etc.
- Details of storage of all raw materials, products and wastes such as segregation, labelling, designation and impervious surface;
- Details of spill or emergency containment measures and structures such as bunds, high level alarms, absorbent materials;
- Details of fire detection and fire-water retention facilities in the event of emergencies or other measures to contain fire-water;
- Details of transport of material within the site, solid, liquid or sludge transported by pipe, vehicle or conveyor; etc.,
- The Agency has published a guidance document on Fire-Water Recention Facilities and on the Storage and transfer of materials.

This part of the form collects information on environmental management at the installation/ facility. It seeks to understand the maturity of the management system in terms of knowledge of abnormal operating conditions, prevention and early detection measures and emergency response procedures. The level of detail required in this part of form relates to the environmental risk posed.

Describe in the table below existing and/or proposed measures, including emergency procedures, to minimise the impact on the environment of an accidental emission or spillage. (This table should include the measures to be taken under abnormal operating conditions, including start-up, shutdown, leaks, malfunctions, breakdowns and momentary stoppages that will demonstrate that any emission arising will not cause significant environmental pollution)<sup>2</sup>.

	Surveillance Measures					
Measure	Description	Frequency of Surveillance	Method / Standard			
ELRA	An ELRA will be introduced at the site as part of Licence Conditions	Reviewed every 3 Years	EPA Standard			
DMP	A DMP will be introduced at the site as part of Licence Conditions	Reviewed every 3 Years	EPA Standard			
Emergency Response Procedure	There is an ERP in place at site as part of the Surface Water management plan.					
Surface Water Plan	Outlines the inspection procedures with regards to SW on site	Weekly				
Bund Integrity Testing	All Bunds on Site to be integrity tested as part of Site Licence Conditions	Re-tested every 3 Years				
Direct all surface water emissions from the site to the Integrated Constructed Wetlands	No Direct surface water discharge to receiving waters without prior treatment in ICW system	Quarterly Monitoring				
	Consent					

<sup>\*</sup>add rows to the table as necessary

<sup>&</sup>lt;sup>2</sup> Information relating to the integrity, impermeability and recent testing or pipes, tanks and bund areas should be included.

Outline what provisions have been made to ensure an adequate response to emergency situations outside of normal working hours, i.e., during night-time, weekends and holiday periods (attach additional pages to this document if required):

The site is manned at all times of the day (i.e., 24 hours), and as such there is a person on site to activate the Emergency Response Procedure and contact emergency services if necessary. There is an emergency response procedure included in the surface water management plan for the site.

#### **Soil Monitoring Points**

Periodic monitoring of soil and groundwater is required having regard to the possibility of soil and groundwater contamination of the site<sup>3</sup>.

Complete the table below with details of soil monitoring locations and in particular where a baseline report has been/is required in accordance with Section 86B of the EPA Act 1992 as amended.

Is periodic soil monitoring proposed at the installation/facility? (Yes/No):

No

Soil Monitoring Point Code	Monitoring Point Grid Ref.			
Soil Worthoring Point Code	Easting <sup>4</sup>	Northing 5		
	N/A	Carz		

<sup>\*</sup>add rows to the table as necessary

<sup>3</sup> Inherent in the monitoring of soil and groundwater is accepting the possible necessity for remediation of the soil / groundwater. Regular monitoring of soil and groundwater provides an early detection of any contaminations.

<sup>4</sup> Six Digit GPS Irish National Grid Reference

<sup>5</sup> Six Digit GPS Irish National Grid Reference

#### **Soil Parameters**

Complete the table below with details of soil monitoring parameters (where a baseline report is required in accordance with Section 86B of the EPA Act 1992 as amended). (If different parameters are associated with different monitoring points this should also be identified in the table below.)

Parameter	Unit	Trigger Level	How was the trigger level determined?	Proposed Monitoring Frequency	Sample Method	Analysis Method / Technique

#### Costed Environmental Liabilities Risk Assessment (ELRA)

Indicate if the activity, through pre-application mapplication.	neeting with the Agency or other means, is required to submit a costed ELRA <sup>8</sup> as part of the licence, or licence review
Costed Environmental Liabilities Risk Assessmen	nt (ELRA) required to be submitted? (Yes/No):
If ' <b>Yes</b> ', upload a costed Environmental Liabilities <i>Costing Environmental Liabilities</i> (2014) (select D	s Risk Assessment (ELRA), prepared in accordance with the <i>Environmental Protection Agency's Guidance on Assessing and</i> Document Type: 'ELRA' in the application form).
Costed <b>ELRA</b> document filename:	N/A
Indicate your preferred form of financial provision	on instrument to meet ELRA costings have regard to the Environmental Protection Agency's Guidance on Financial Provision
(2015), e.g., Environmental Liability Insurance:	od odder
Environmental Liability Insurance	COLLY SELV
Upload a financial provision proposal have regardapplication stage) (select Document Type: 'Financial Provision proposal have regardapplication stage)	ard to the Environmental Protection Agency's Guidance on Financial Provision (2015) (where required at application /reviev <u>acial Provision Proposal</u> ' in the application form)
Financial Provision Proposal filename:	N/A FOLITE HELD CONTROL OF THE PARTY OF THE
	Consent of C

Regard should be had by applicants to relevant Agency guidance on these matters.

There is an explicit requirement in EU and Irish law for financial provision for certain activities. The following categories of activities have an ELRA/CRAMP/FP requirement:

<sup>1.</sup> Landfills (excl. closed L.A. Landfills closed before 16th July 2009)

<sup>2.</sup> CAT A Extractive Waste Facilities

<sup>3.</sup> High Risk Contaminated Land Facilities

<sup>4.</sup> All Haz-Waste Transfer Stations

<sup>5.</sup> Non-Haz WTS (Accepting >50,000 tons/annum)

<sup>6.</sup> Incineration (incl. co-incineration of hazardous waste)

<sup>7.</sup> Upper & Lower Tier Seveso Sites

<sup>8.</sup> Exceptional circumstances associated with the site, e.g., significant ground/groundwater contamination.

#### Closure, Restoration and Aftercare Management Plan (CRAMP)

A restoration/aftercare period will be required where there are on-going environmental liabilities following closure. Applicants are required to describe the existing or proposed measures to avoid any risk of environmental pollution and to return the site to a satisfactory state or the state established in the baseline report where applicable, after the activity or part of the activity ceases operation.

A key measure is the preparation of a Closure, Restoration and Aftercare Management Plan (CRAMP) by the operator, for certain activities<sup>9</sup>. Notwithstanding the requirements of the EC Environmental Objectives (Groundwater) Regulations 2010, S.I. No. 9 of 2010, the closure and restoration/ aftercare target is the site condition at the time of the original application or the baseline report. The applicant shall have regard to the Environmental Protection Agency's Guidance on Assessing and Costing Environmental Liabilities (2014) in the preparation of the CRAMP.

	·· ———	٠. ب		
CRAMP filename:	N/A	ther		
Costed CRAMP		ooses of the any o		
Indicate if the activity, through pre-apparent application.	olication meeting with the Agency or other	er means, by required to have	a CRAMP <sup>9</sup> submitted as	s part of the licence, or licence reviev
CRAMP required to be submitted at a	pplication/licence review application stage	Yes/No):	No	
Indicate your preferred form of financial	provision instrument to meet CRAMP cost	tings (where appropriate), e.g.	, Secured fund, On-demar	d performance Bond, Parent Compan
Guarantee, Charge on Property (have re	gard to the Environmental Protection Age	ncy's Guidance on Financial Pr	covision (2015) on the Age	ency's website):
State preferred form of financial provis	sion instrument?			

The following categories of activities have an ELRA/CRAMP/FP requirement:

- 1. Landfills (excl. closed L.A. Landfills closed before 16<sup>th</sup> July 2009)
- 2. CAT A Extractive Waste Facilities
- 3. High Risk Contaminated Land Facilities
- 4. All Haz-Waste Transfer Stations
- 5. Non-Haz WTS (Accepting >50,000 tons/annum)
- 6. Incineration (incl. co-incineration of hazardous waste)
- 7. Upper & Lower Tier Seveso Sites
- 8. Exceptional circumstances associated with the site e.g. significant ground/groundwater contamination.

Upload a CRAMP, where applicable (select Document Type: 'Site Closure' in the application form).

There is an explicit requirement in EU and Irish law for financial provision for certain activities. The applicant shall have regard to the Environmental Protection Agency's Guidance in determining CRAMP requirements and on Financial Provision (2015) in making financial provision to cover any liabilities.

Upload a financial provision proposal (where required) having regard to the Environmental Protection Agency's Guidance on Financial Provision (2015) in making financial provision to cover any liabilities (select Document Type: 'Financial Provision Proposal' in the application form)

Financial Provision Proposal filename:	N/A

#### **Cessation of Activity**

Where a CRAMP is not required, describe the measures to be taken on and following the permanent cessation of the activity or part of the activity to avoid any risk of environmental pollution and to return the site of the activity to a satisfactory state. (Input your response in the text box below or attach the information in to this attachment).

A Decommissioning Management Plan (DMP) will be developed as part of the site Industrial Emissions Licence Conditions and introduced on site following the initiation of the site licence

#### **Emergency Response Procedure**

Do you have an emergency response procedure (ERP)? (Yes/No)

Is the ERP compliant with the EPA guidance? (Yes/No)

# to inspectorine Ted inspectorine Ted inspectorine No

#### 9.2. Nuisance

Complete the table below in relation to each potential nuisance. Identify if the activity may cause or contribute to the type of nuisance in the area of the installation/facility and, where applicable, identify the techniques used to prevent/minimise the nuisance.

Type of Nuisance	Applicable to the activity? (Yes/No/ Not Applicable)	Techniques to prevent nuisances	Where nuisances cannot be prevented, techniques to be used to minimise and reduce nuisances
Odour	No	N/A	N/A
Fire Control	Yes	Proper Fire Control Detection & Suppression Measures on site	Suppression as soon as possible

Type of Nuisance	Applicable to the activity? (Yes/No/ Not Applicable)	Techniques to prevent nuisances	Where nuisances cannot be prevented, techniques to be used to minimise and reduce nuisances
Dust	Yes	Cyclones on Emission Points, Dampening yard area to keep dust down during dry periods	Cyclones on Emission Points, Dampening yard area to keep dust down during dry periods
Litter	No	N/A	N/A
Birds	No	N/A	N/A
Mud	No	N/A	N/A
Flies	No	N/A	N/A
Vermin	Yes	Pest control	en/A
Other		other

#### 9.3. Environmental Management System (EMS)

200 (0.1)			
Do you have an environmental management system? (Yes/No)	No		
If 'Yes', is the environmental management system accredited? (Yes/No)	No		
State the date accreditation was achieved $\underline{\mathbf{or}}$ is expected to be achieved, where applicable:	N/A		
State the standard of accreditation achieved:			
Energy Efficiency		o.·	
the relevant decision on BAT conclusions and/or BAT guidance and where appropriate, an energy audit with reference to the EPA Guidance document on Energy Audit should be carried out.	es offy, any off,	cy assessment was completed for the site in 2016	
Has an energy audit been carried out? (Yes/No)	Yes		
Has an energy audit been carried out? (Yes/No)  Do you have an energy efficiency management system? (Yes/No)  If 'Yes' is the energy efficiency management system accredited? (Yes/No)	Yes		
If 'Yes', is the energy efficiency management system accredited? (Yes/No)	No		
State the date accreditation was achieved <u>or</u> is expected to be <u>achieved</u> , where applicable:			
State the standard of accreditation achieved:			

#### 9.4. Hours of Operation

Provide details of the hours of operation for the installation (hours and days per week, etc.), including:

- (a) Proposed hours of operation. 24 Hours a day
- (b) Proposed hours of construction and development works and timeframes. N/A
- (c) For waste activities, the proposed hours of waste acceptance. -N/A
- (d) Any other relevant hours of operation expected (e.g., waste handling, etc.). N/A

). - N/A

For its pection purposes only and other tise.

#### 9.5. Review of a Licence

Where the Office of Environmental Enforcement (OEE) has agreed any variations or adjustments to the conditions or schedules of the existing licence, the licensee must provide details of these agreed variations and adjustments to the existing licence conditions in the table that follows.

An updated, scaled drawing of the site layout (no larger than A3) providing visual information on such adjustments or variations where appropriate should be uploaded in the **site tab** – 'site plan(s)' upload.

In the case of once-off assessments/reports required under conditions/schedules of the existing licence the licensee must provide details of those assessments/reports that have been completed and agreed with the OEE or as otherwise agreed, in the table below.

Condition/ Schedule No.	<b>Existing Condition</b>	OEE Agreement Reference	Description Description
