

Facility Information Summary	
AER Reporting Year	2017
Licence Register Number	W0036-02
Name of site	Indaver Ireland Limited
Site Location	Tolka Quay Road, Dublin 1
NACE Code	3821 and 3822
Class/Classes of Activity	3.11, 3.12, 3.13, 4.1, 4.13
National Grid Reference (6E, 6 N)	-6.20299, 53.3521
A description of the activities/processes at the site for the reporting year. This should include information such as production increases or decreases on site, any infrastructural changes, environmental performance which was measured during the reporting year <b>and an overview of compliance with your licence listing all exceedances of licence limits (where applicable) and what they relate to e.g. air, water, noise.</b>	<p>The site has 2 main functions. The first being the acceptance of waste packages to the site for onward shipping to outlets generally based in mainland Europe. The site has storage space for these wastes and they are segregated by hazard class. The second function is the operation of a solvent recovery facility-here bulk liquids, generally solvents, and drummed waste, are bulked up in large tanks and blended to produce a fuel for the cement kiln industry. Some waste from here would also go to Europe for disposal e.g. aqueous wastes with little calorific value.</p> <p>Indaver is committed to its EHS management processes and as such completed its ISO 9001, 14001 and OHSAS 18001 certification in May 2017. Indaver continues to be certified to these standards. Indaver's core principle of sustainability was also demonstrated by producing an aqueous load which went to its facility in Duleek for incineration during a test programme. This will ensure that in future, once the test programme is approved, that this material will be treated on the island of Ireland instead of being shipped to Europe for treatment.</p> <p>There were no complaints in 2017. There was 1 incident for elevated VOC readings at the Solvent recovery facility. A carbon filter was changed and there were no more issues. There was one non compliance noted during a site visit for segregation issues of packaged waste. This was rectified.</p>
