

Appropriate Assessment Screening Determination

In accordance with Regulation 42(1) of the European Communities (Birds and Natural Habitats) Regulations 2011 as amended, the Agency has undertaken Appropriate Assessment screening to assess, in view of best scientific knowledge and the conservation objectives of the site, if the activities, individually or in combination with other plans or projects are likely to have a significant effect on European Sites. In this context, particular attention was paid to the European Sites listed below.

Date of AA Screening Determination:	15 th May 2018

AA Screening Determination:

That the activities are not directly connected with or necessary to the management of any European site and that it can be excluded, on the basis of objective information, that the activities, individually or in combination with other plans or projects, will have a significant effect on any European site and accordingly determined that an Appropriate Assessment of the activities was not required.

The reasons for which the Agency determined that an Appropriate Assessment of the activities is not required are as follows:

- The monitoring results of the discharge from the facility to the Ballystrahan Stream show that this discharge is within the limits as set out in the existing licence Reg. No. W0277-02.
- The status of River Ward, downstream of the confluence with the Ballystrahan Stream, is good.
