Dear Magnus,

In reply to your email below:

I have prepared a new AA for the proposed development. Please find attached. On reviewing the AA that was prepared in 2011 the stream flow direction was misreported and did not represent the actual stream flow on the ground. This AA was based on just one round of environmental monitoring. The new AA attached is based on environmental monitoring carried out over a number of years and the correct direction of stream flow.

I request that that you review the AA attached and that the recommendations from the review of the previous AA submitted be set aside. This AA was based on information that was not factually correct.

I have also attached the documentation in respect of the Qualified Person, James O'Neill, having regard to the Code of Practice.

Hard copy to follow in the post.

Anne Peters,
