Authorisation Application Form

Storage of Waste and Other Materials

State the maximum amount of waste and other materials that will be stored on the site at any one time in the table below¹.

Waste/Other Material	Amount (tonnes)
Waste accepted and in storage pending treatment	1,551 tonnes
Other materials (Non-waste) accepted, including non-waste feedstocks	
Capacity of treatment vessels and chambers	
Treated waste, whether classified as waste or not	

List any other feedstocks to the treatment process not classified as waste. State 'none' if none.

None

¹ This should include waste and other materials in: (1) reception, inspection and quarantine areas; (2) storage pending treatment; (3) storage after treatment; and (4) vessels, chambers or tanks during treatment or processing.

Authorisation Application Form

Waste and material outputs from waste activities (i.e., those subject to Waste licensing or class 11 of the First Schedule of the EPA Act)

Describe the waste and material outputs from the installation resulting from the treatment of waste. If no treatment is carried out on the waste, the waste outputs will be the same as the inputs.

If waste is treated, describe the nature and quantity of the treated waste and its onward fate/destination, and in particular whether it is sent for onward recovery or disposal operations.

If waste is treated and a material is produced that is no longer a waste, provide the rationale for such classification. The requirements of Article 28 of the European Communities (Waste Directive) Regulations 2011 should be addressed in any such rationale. Include the response in this attachment.

The mixed wastes are mechanically separated by type (plastic, paper, cardboard, metals) and then baled and stored prior to transfer to other facilities for further processing, for example paper mills, steel mills, aluminium smelters and plastics factories. The processing is highly automated and manual picking is mostly limited to quality control. Non-recyclable residues are sent to other waste management facilities in Ireland for processing to produce solid recovered fuel (SRF).

Authorisation Application Form

For Soil Recovery Activities (only), please complete the following table: [Not Applicable](#)

All blank fields in the table are mandatory

Soil Recovery Activity Details	Input a value into ALL blank cells (where applicable)		
Volume of void to be filled and authorised by planning permission:			m ³
Quantity of waste soil and stone that is required to fill the void:			tonnes
Proposed annual intake of waste soil and stone:			tonnes per annum
Proposed duration to complete the fill :			years
Stage of fill: 'Not Commenced' OR 'Commenced':			
- If commenced: quantity of waste already deposited in the void: (Enter a value in both cells)		m ³	Tonnes
- Volume of void remaining:			m ³
Period of previous fill: (<Year> to <Year>):			
Quantity of fill authorised by planning permission: (Enter a value in both cells)		m ³	Tonnes
Waste Licence, waste facility permit, or certificate of authorisation number: (Attach copy in this document)
