

This EU Waste Management Hierarchy in descending order the current preference is: -

- Prevention;
- Preparing for Reuse;
- Recycling;
- Other Recovery (including energy recovery); and
- Disposal.

FHR accepts and processes mixed dry recyclables to separate out the fractions that are suitable for recycling and these are sent to recycling facilities. Those materials are not suitable for recycling are sent for further processing to produce solid recovered fuel which is used in waste to energy installations and cement kilns as a replacement to fossil fuels.
