Killian

You might let me know please what you'd like me to do with your technical amendment request or whether it should be maintained as active.

Thanks.

Brian.

Killian,

In relation to your request (dated 30/6/2014 and directed to the OEE in Castlebar) for amendment of licence register number W0021-02 Derrinnumera Landfill to provide for emission limit values and emissions monitoring for a gas utilisation engine, would you mind telling me if, to your knowledge, Mayo County Council or the Agency has ever carried out an assessment of the potential environmental impact of engine emissions. Such an assessment would normally take the form of an air dispersion model although given the age of the original licence, the assessment might have taken another form.

I would also ask whether the installation of a gas engine requires planning permission and whether same has been sought or granted. Please provide any details and state whether the application was accompanied by an EIS and screening for Appropriate Assessment and/or Appropriate Assessment.

Thanks and best regards

Brian Meaney
