

Alteration Details		
Licence	W0129-02	Integrated Materials Solutions Limited Partnership
Licensee	Integrated Materials Solutions Limited Partnership	
Title of Alteration	Technical Amendment Condition 3.5.5	

Screening Report

No.	Question	Answer
1	Does the proposed alteration require a new class of activity or process?	No
2	Does the proposed alteration cause a new / additional main emission point?	No
3	Does the proposed alteration increase or change specified emissions significantly?	No
4	significantly? Does the proposed alteration increase significantly the overall total emission from the installation/facility?	No
5	Does the proposed alteration involve development or proposed development that has already been granted planning permission or requires a grant of planning permission and was/is subject to EIA by the Planning Authority or An Bord Pleanála?	No
6	Did the proposed alteration require the preparation of a Natura Impact Statement (NIS) for consideration by any Planning or Public Authority?	No
7	Does the proposed alteration indicate that the EPA should conduct an Appropriate Assessment (on foot of a screening for Appropriate Assessment)?	No
8	Does the proposed change conflict with BAT as set out in the relevant BAT Conclusions? See here	No
9	Does the proposed alteration adversely affect the energy efficiency of the installation/facility?	No
10	Does the proposed alteration adversely affect the environmental risk of the installation/facility significantly ?	No

11	Does the proposed alteration cause an increase above the capacity limitations specified in the licence?	No
12	Does the proposed alteration require an extension of operating hours (where controlled by the licence) for an installation/facility where the public is likely to have an interest in such an extension?	No
13	Does the proposed alteration involve the incineration or co-incineration of waste materials displaying hazardous properties that were not previously authorised (as per the WID/IED)?	No
14	Does the proposed alteration introduce materials of techniques which adversely alter the probability, magnitude and duration or complexity of the site transboundary impact?	No
15	Does the proposed alteration constitute a substantial change?	No
16	Does the proposed alteration require a change to a condition of schedule of the Licence?	Yes

Recommendation

Based on your responses to the forgoing questions the recommended option is for you to submit a 'Request Licence Amendment' for this proposed afteration.

To submit this request to the EPA you should locate it in the 'Request Alteration' area in LMA. Click on 'Proceed' against this saved request, and then click on the 'Request Licence Amendment' button (in STEP 2 of the process). Then you will be required to provide more detailed information about your proposed amendment.

Note: The responses you have provided in this Screening Report will form part of the information record if you decide to proceed with this alteration request.

Recommendation Date: 09/03/2018

Clerical or Technical Amendment Application Details

Proposed Alteration Description

The alteration involved the amendment of a condition relating to the backfilling of the former quarry sump area in the south of the site. The current licence was issued at a time when the site was operating as both a landfill and quarry. It was envisaged that the quarry sump would be backfilled to the prescribed formation level (104.5mOD) with waste from quarry activities. Quarrying activities ceased in 2008 and it is not planned that they will resume. The proposed alteration is to allow other suitable backfill material to be imported to site and used to backfill the sump. This will allow development of the next landfill cell so that waste can be accepted. It will also remove a large body of standing water which presents a health and safety risk at the site. Further information is contained within the attached technical submission prepared by Golder Associates on behalf of IMS.

Priority	3. Urgent
Category of Amendment	(c) Otherwise facilitating the operation of the licence (or certificate) and the making of the amendment does not result in the relevant requirements of section 83(5) of the EPA Act as amended/ section 42B(1) of the Waste Management Act as amended/environmental requirements ceasing to be satisfied

Licence Condition Changes			
Condition / Schedule Reference	Current Condition / Schedule Wording	Suggested New Wording	
3.5.5	The formation level of the basal liner prior to emplacement of compacted clay shall be constructed at least one metre above the water table and in any event the formation level of the liner shall be no lower than 104.5 mAOD Main. Any excavations deeper than the formation level shall only be backfilled with granular materials quarried from the facility.	The formation level of the basal liner prior to emplacement of compacted clay shall be constructed at least one metre above the water table and in any event the formation level of the liner shall be no lower than 104.5 mAOD Malin. Any excavations deeper than the formation level shall be backfilled with granular materials quarried from the facility or as approved by the Agency.	

	Questions			
Q1	Is planning permission required to support the proposed alteration?	No		
Q2	Does the application involve an installation boundary change?	No		
Q3	Does the application involve changes to emissions to sewer?	No		
Q4	Attach Appropriate Assessment Screening Report here	Appropriate Assessment.pdf
