AA Screening Determination:

That the activity is not directly connected with or necessary to the management of any European site and that it can be excluded, on the basis of objective information, that the activity individually or in combination with other plans or projects, will have a significant effect on any European site and accordingly determined that an Appropriate Assessment of the activity was not required.

The reasons for which the Agency determined that an Appropriate Assessment of the activity is not required are as follows:

- There will be no significant emissions to air from the facility.
- The only emissions from the facility will be the discharges of storm water into River Delvin and River Fourknocks which ultimately discharge into a coastal waterbody, 9km downstream of the facility. The Water Framework Directive (WFD) status of this coastal waterbody is good.

- The nearest European Site, River Nanny Estuary and Shore SPA (Site Code: 004158), is located 10 km downstream of the facility, in this coastal waterbody.
