1. Technical Competence and Site Management

Roadstone Ltd. have a competent management system in place with respect to management of the proposed Soil Recovery Facility (SRF) based at the Garryhesta Quarry, Knockanemore, Ovens, Co. Cork. Leonard Grogan – Soil Recovery Facility Manager will be responsible for the overall management of the facility.

The quarry has an established Environmental Management System (EMS). The existing EMS was established in compliance with Planning Permission Condition no. 39 of Planning Permission QR19 06/11798 & PL04.225332 for the quarry.

Roadstone Ltd. regards environmental protection management as an integral and essential part of good business practice. They are committed to achieving and maintaining a high standard of environmental quality in all of their operations.

Roadstone Ltd are committed to providing the necessary information, training and equipment to enable their employees to carry out their duties safely and in an environmentally responsible manner. All staff and persons working for and/or on behalf of Roadstone Ltd. are made aware of the Environment Policy.

A facility manager will be appointed by Roadstone Ltd. to ensure that the Environmental Management System, Environmental Objectives & Targets and the Environmental Monitoring Plan are fully implemented.)

The SRF will require one person to operate a bulldozer/excavator and one general foreman to monitor and inspect the quality and suitability, of imported materials being brought to the site for recovery and two other general site operatives. It is expected that the existing staff will take on these roles.

Information relating to future employee responsibilities and experience will be passed onto the EPA as appropriate.
