Storage of Waste and Other Materials

State the maximum amount of waste and other materials that will be stored on the site at any one time in the table below¹.

Waste/Other Material	Amount (tonnes) *
Waste accepted and in storage pending treatment:	Not Applicable
Other materials (Non-waste) accepted, including non-waste feedstocks:	Not Applicable
Capacity of treatment vessels and chambers:	Not Applicable
Treated waste, whether classified as waste or not:	Not Applicable

List any other feedstocks to the treatment process not classified as waste. State 'none' if none. *

None. No waste treatment undertaken at proposed facility.

For inspection purposes only. Consent of copyright owner required for any other use.

¹ This should include waste and other materials in: (1) reception, inspection and quarantine areas; (2) storage pending treatment; (3) storage after treatment; and (4) vessels, chambers or tanks during treatment or processing.

Waste and material outputs from waste activities (i.e., those subject to Waste licensing or class 11 of the First Schedule of the EPA Act)

Describe the waste and material outputs from the installation resulting from the treatment of waste. If no treatment is carried out on the waste, the waste outputs will be the same as the inputs.

If waste is treated, describe the nature and quantity of the treated waste and its onward fate/destination, and in particular whether it is sent for onward recovery or disposal operations.

If waste is treated and a material is produced that is no longer a waste, provide the rationale for such classification. The requirements of Article 28 of the European Communities (Waste Directive) Regulations 2011 should be addressed in any such rationale. Include the response in this attachment.

It is expected that all soil and stone waste presented at the facility will be inert and acceptable for recovery.

With robust waste acceptance procedures in place, it is anticipated that all waste intake will be suitable for recovery by immediate placement on land for backfilling and restoration purposes, without any requirement for further treatment or for any on-site storage pending further treatment.

While some imported soil / stone waste materials may on occasion be stored or stockpiled on site for operational or logistical reasons, they will not require further treatment prior to being recovered.

For Soil Recovery Activities (only), please complete the following table:

All blank fields in the table are mandatory

Soil Recovery Activity Details	Input a value into ALL blank cells (where applicable)			
Volume of void to be filled and authorised by planning permission:	800,000		m ³	
Quantity of waste soil and stone that is required to fill the void:	1,200,000		tonnes	
Proposed annual intake of waste soil and stone:	300,000		tonnes per annum	
Proposed duration to complete the fill:	4 to 8		years	
Stage of fill: 'Not Commenced' OR 'Commenced':	Commenced			
- If commenced: quantity of waste already deposited in the void: (Enter a value in both cells)	38,350	m ³	57,533	Tonnes
- Volume of void remaining:	761,650		m ³	
Period of previous fill: (<Year> to <Year>):	2016 to 2018			
Quantity of fill authorised by planning permission: (Enter a value in both cells)	800,000	m ³	1,200,000	Tonnes
Waste Licence, waste facility permit, or certificate of authorisation number: (Attach copy in this document)	WFP-KE-16-0085-01
