Storage of Waste and Other Materials

State the maximum amount of waste and other materials that will be stored on the site at any one time in the table below¹.

Waste/Other Material	Amount (tonnes) *
Waste accepted and in storage pending treatment:	2601
Other materials (Non-waste) accepted, including non-waste feedstocks:	0
Capacity of treatment vessels and chambers:	0
Treated waste, whether classified as waste or not:	0

List any other feedstocks to the treatment process not classified as waste. State 'none' if none. *

R13 Storage material description	Provision (tonnes)
Temporary storage of incoming, suitable-for-recovery waste subsoil	1500
Daily temporary storage	1000
Waste extracted from incoming wastes - e.g. non-natural, non-soil and stone materials	50
Arriving, tipped, loads not suitable for recovery that could not be immediately reloaded (stored temporarily at quarantine area)	50
Waste produced at the facility itself, not arising out of incoming wastes - office or domestic type waste or collected litter from the site and surrounds	1
Total	2,601

Consent of copyright owner required for any other use. For inspection purposes only.

¹ This should include waste and other materials in: (1) reception, inspection and quarantine areas; (2) storage pending treatment; (3) storage after treatment; and (4) vessels, chambers or tanks during treatment or processing.

Waste and material outputs from waste activities (i.e., those subject to Waste licensing or class 11 of the First Schedule of the EPA Act)

Describe the waste and material outputs from the installation resulting from the treatment of waste. If no treatment is carried out on the waste, the waste outputs will be the same as the inputs.

If waste is treated, describe the nature and quantity of the treated waste and its onward fate/destination, and in particular whether it is sent for onward recovery or disposal operations.

If waste is treated and a material is produced that is no longer a waste, provide the rationale for such classification. The requirements of Article 28 of the European Communities (Waste Directive) Regulations 2011 should be addressed in any such rationale. Include the response in this attachment.

For Soil Recovery Activities (only), please complete the following table:

All blank fields in the table are mandatory

Soil Recovery Activity Details	Input a value into ALL blank cells (where applicable)			
Volume of void to be filled and authorised by planning permission:				m ³
Quantity of waste soil and stone that is required to fill the void:	1,332,084			tonnes
Proposed annual intake of waste soil and stone:	532,833			tonnes per annum
Proposed duration to complete the fill:	2.5 minimum			years
Stage of fill: 'Not Commenced' OR 'Commenced':				
- If commenced: quantity of waste already deposited in the void: <u>(Enter a value in both cells)</u>	0	m ³	0	Tonnes
- Volume of void remaining:	740,000			m ³
Period of previous fill: (<Year> to <Year>):				
Quantity of fill authorised by planning permission: <u>(Enter a value in both cells)</u>	0	m ³	0	Tonnes
Waste Licence, waste facility permit, or certificate of authorisation number: <u>(Attach copy in this document)</u>
