

**Attachment-4-3-1-Storage of Waste and Other Materials (Supporting Information)**

**Storage of Waste and Other Materials:**

Storage Area	Tonnes	Details
<b>Waste accepted and in storage pending treatment</b>		
Hazardous Waste Containers	40	Storage capacity based on proposed containers
Non-Hazardous Waste Containers	300	Storage capacity based on proposed containers
<b>Subtotal</b>	<b>340</b>	
<b>Other materials (non-waste) accepted, including non-waste feedstocks</b>		
<b>Subtotal</b>	<b>0</b>	
<b>Capacity of treatment chambers and vessels</b>		
<b>Subtotal</b>	<b>0</b>	
<b>Treated waste, whether classified as waste or not</b>		
<b>Subtotal</b>	<b>0</b>	
<b>TOTAL</b>	<b>340</b>	

The above quantities are based on the maximum available storage capacity in the proposed containers as set out in the Site Plan. This maximum on-site storage of waste is based on all non-hazardous and hazardous waste containers being full at the same time. In practical terms, this will not be permitted to occur, and waste containers will be removed from site on a regular basis to ensure there is available capacity for members of the public to deposit their waste.

Any treatment of incoming waste carried out at the facility (as proposed under Recovery Activity Codes R03, R04 and R05 and described in Attachment-4-3-4-R and D Activity Capacity Calcs) will only involve sorting, repackaging and compacting of waste such that the waste input quantity and the waste output quantity will be the same.
