In this context, particular attention was paid to the European Sites listed below.

### AA Screening Determination:

That the activity is not directly connected with or necessary to the management of any European site and that it cannot be excluded, on the basis of objective information, that the activity, individually or in combination with other plans or projects, will have a significant effect on any European site and accordingly determined that an Appropriate Assessment of the activity is required.

The reason for this determination is as follows:

- there is hydrological connectivity between the landfill site and surface waters which ultimately discharge into the above European Sites.
