Dear Ms. English,

**RE: Greater Dublin Area Agglomeration Waste Water Discharge Licence  
 D0034-01 – Clerical Amendment Application**

The Agency issued a Wastewater Discharge Licence for the Greater Dublin Area agglomeration (D0034-01) on 27<sup>th</sup> July 2010 and a technical amendment (TA) B on 20<sup>th</sup> February 2018.

Irish Water now requests a Clerical Amendment under Section 33 (1) of the Waste Water Discharge (Authorisation) Regulations 2007, as amended, to amend *Schedule A.4 Storm Water Overflows*.

In Technical Amendment B, the Agency approved the addition of a storm water overflow (SWO) in Schedule A.4 of the licence. However, a clerical error has been identified in the related TA request (dated 14<sup>th</sup> Feb 2017), and Irish Water now requests the coordinates of this SWO discharge location be amended as per the table below (Note; the coordinates on the map provided with the above TA request were correct. The coordinates were incorrect in the table of the TA request).

| Discharge point Code (as per TA B) | Source           | SWO Discharge Location | Name of Receiving Water | WFD Code Receiving Water |
|------------------------------------|------------------|------------------------|-------------------------|--------------------------|
| SW221Dublin                        | Storm Water Tank | E 308266<br>N 238795   | River Tolka             | IE_EA_09T011000          |

Irish Water has had regard to the EPA's publication *EPA Guidance for Irish Water on Requests for Alterations to a Waste Water Discharge Licence or Certificate of Authorisation* in compiling this submission for a Clerical Amendment.

The proposed change will not result in a material change to the nature or volume of the discharge from the agglomeration.

Yours sincerely,

Niall Horgan

Environmental Regulation Manager
