Proposed Alteration Description

Note 4 to Schedule A. 1 states that the tonnage of waste to be accepted at W0167-03 is limited to 235,000T/annum up to 31/12/2019. Thereafter it is to reduce to 220,000T/annum. This note was entered into the licence because of a planning condition that was associated with the facility. This planning condition has now been altered to allow us to continue to accept 235,000tonnes of waste per annum with no end date-see attachment below.

I spoke with Patrick Doyle by phone and he said to not tick the planning condition as a yes on the screening report as this had previously been discussed with Brian Meaney and Magnus and we had agreed that the technical amendment route was the correct route as it is a note to a schedule and it was only in the licence because of the planning condition. It was also discussed with the inspector for the site Thomas Sexton and Caroline Kelly. The An Bord Pleanála decision is attached below.

Priority	2. High
Category of Amendment	(b) Facilitating the doing of any thing pursuant to a condition attached to the licence where the doing of that thing may reasonably be regarded as having been contemplated by the terms of the condition or the terms of the licence taken as a whole but which was not expressly provided for in the condition
