- Mobile plant operators
- General Operatives
- Administration

## Operating Procedures

KLL has prepared a comprehensive set of Operating Procedures that cover all aspects of the day to day management of the installation and contingency measures. The procedures form part of the installation's Environmental Management System (EMS), which is certified to ISO 14001, and are subject to regular review based on operational experience, legislative changes and improvements in best practice. The current set of procedures are in Appendix 2 of Attachment 4-8-1 Operational Report and these will be amended to reflect the new waste activities authorised under the revised licence.
