Roadstone regards environmental protection management as an integral and essential part of good business practice. They are committed to achieving and maintaining a high standard of environmental quality in all of their operations.

Roadstone is committed to providing the necessary information, training and equipment to enable their employees to carry out their duties safely and in an environmentally responsible manner. All staff and persons working for and/or on behalf of Roadstone Ltd. are made aware of the Environment Policy.

Roadstone has NSAI accreditation for both Environmental Management (ISO 14001) and Energy Management (ISO 50001) These systems are externally audited and verify the company's commitment to continuous assessment and improvement of our management systems in these areas.

Roadstone staff has extensive experience in managing quarrying operations, as well as operating soil recovery facilities. An appropriately qualified team including a facility manager will be put in place by Roadstone to ensure that the site operates to the highest standards and in compliance with the Environmental Management Systems and Waste Licence conditions.

**Table 1** overleaf outlines the experience and qualifications of key staff. An organogram of the company and site management structure is also provided.
