Subject: Barnageeragh Landfill

Dear Ewa,

Please find attached an updated drawing showing the proposed final layout of the landfill gas system at Barnageeragh landfill, Skerries, Co. Dublin. The gas vents that were in place are connected to a single landfill gas vent that is 6m high. This will be the only landfill gas emission point on the landfill. The reason for this is that that capped landfill will become a public area and having landfill gas vents across the site would pose issues in terms of maintenance and H&S.

The boreholes shown on the drawing are all accessible for future monitoring if needed.

Best regards,
Gareth
