**Subject:** RE: Barnageeragh Landfill

Dear Ewa,

Further to my email below, I can confirm that the landfill gas arrangement is that the gas vents GV1 through GV5 shown on drawing ref. MGE0755-RPS-01-XX-DR-C-DG0002 in the Tier 2 and Tier 3 report (page 68/73 of the PDF) have all been connected to the single landfill gas vent shown on the drawing emailed last Friday, 16<sup>th</sup> October. All other boreholes are accessible for monitoring.

Best regards,  
Gareth

**Subject:** Barnageeragh Landfill

Dear Ewa,

Please find attached an updated drawing showing the proposed final layout of the landfill gas system at Barnageeragh landfill, Skerries, Co. Dublin. The gas vents that were in place are connected to a single landfill gas vent that is 6m high. This will be the only landfill gas emission point on the landfill. The reason for this is that that capped landfill will become a public area and having landfill gas vents across the site would pose issues in terms of maintenance and H&S.

The boreholes shown on the drawing are all accessible for future monitoring if needed.

Best regards,  
Gareth
