3 Technical Knowledge and Roles and Responsibilities of persons with managerial responsibility

Joyce Power - Quality and Operations Director

HealthBeacon manufacture an FDA approved Medical Device for use in patients home and as such operate to extremely high International Regulatory standards in the U.S (FDA Cleared), E.U (CE Marked) and are accredited to ISO 27001 . HealthBeacons Quality Director ensures a very high standard of practice in all HealthBeacon activities and as such will have direct oversight of the HB Green labs facility ensuring the same level of standard is maintained throughout. Health & Safety compliance will be overseen by Joyce and HealthBeacons Medical Science Liaison Officer, Dr Sharifah Sarhan. All new hires that will undertake operational activities in the new facility will report directly to the Quality and Operations Director. The Quality Director, will implement training for operatives on conforming to EU / Irish legislation as to Prevention of Sharps Injuries in the Healthcare Sector to include visual aids, incident response procedures and health screening. Rogers Consultants (Brian Rogers) will assist in relevant training of the facility.

Richard Shattock (Manager of Strategic Projects) will be the designated Environmental Manager for the proposed waste facility. Richard will be responsible for managing environmental aspects and potential environmental impacts associated with the proposed waste activity and ensuring compliance with the waste licence for the activity, in addition to ensuring all relevant operational staff are aware of and trained in environmental management practices and procedures for the proposed facility. Richard will also assume the role of Dangerous Goods Safety Advisor (DGSA) and undertake the relevant qualification.

Dominick Hoey - Quality Technician (Quality & Sustainability Process Control)

Dominick has overall responsibility in the production and quality of HealthBeacon's Smart Sharps Bin system and oversees production activities associated with this, including reporting to the Quality and Operations Director . Dominick will oversee day to day activities in HB Green Labs and ensure that the ReUse Operators are following strict Standard Operating Procedures in line with approved activities and in accordance with the validated protocols and licensing requirements. Dominick will ensure that efficient logs/reporting activities are fed up to the Quality and Operations Director on a weekly basis.
