Subject: FAO Ewa Babiarczyk - Mulroy Environmental Ltd. - Tullyvogheen Historic Landfill - REGULATION 7(2) COMPLIANCE REQUIREMENTS

Tullyvogheen Historic Landfill - Notice in accordance with Regulation 7(4) of the Waste Management (Certification of Historic Unlicensed Waste Disposal and Recovery Activity) Regulations, 2008

Dear Mrs. Babiarczyk,

Following on from our previous telephone conversation with regard to the request for further information, paragraph 2 of the RFI states the following:

'2. Provide two documents that relate to the Qualified Person as required under Section 2.3 of the EPA Code of Practice-Environmental Risk Assessment for Unregulated Waste Disposal Sites.'

Please find attached a draft letter to Galway C.C. Director of Services that was submitted for a previous COA application to Kildare C.C. (i.e. Carrigeen Landfill).

Do we need to send this? Is this the 2nd document?

We are intending to submit the first part of the Further Information report today.

Please call if you have any questions.

Yours sincerely,

Padraic Mulroy

25th February 2021

Re: Risk assessment on an historic landfill in support of an application for a certificate of authorisation in accordance with regulation 7 of the Waste Management (Certification of Historic Unlicensed Waste Disposal and Recovery Activity) Regulations 2008.

Dear Mr. Ryder,

As a person who is qualified, trained and experienced to the standard set out in section 2.3 of Code of Practice: Environmental Risk Assessment for Unregulated Waste Disposal Sites (EPA, 2007), it is my opinion that the risk assessment carried out by Galway County Council in relation to a closed landfill at Tullyvogheen, Clifden, County Galway is adequate and complete.

The risk assessment complies with all of the requirements of the Code of Practice. The local authority or its agent/contractor, in carrying out the risk assessment, has followed and completed the steps set out in the Code of Practice and associated guidance (Matrix 1 and Matrix 2 – as published).

The following items:

- the risk assessment,
- the findings and conclusions of the risk assessment,
- the remedial measures proposed, if any, and
- the monitoring proposed to be carried out to demonstrate the effectiveness of the remedial
- measures, if any, are, in my opinion, appropriate and adequate to:

- identify the instances and risks of environmental pollution arising from the closed landfill to which this application refers,
- proportionately address any and all such instances and risks of environmental pollution, and
- ensure that any future instances of environmental pollution will be detected in a timely manner.

I have advised the local authority on the following aspects of this project or have carried out or managed the following aspects of the project on behalf of the local authority (tick the applicable bullet points):

- Tier 2 risk assessment
- Tier 3 risk assessment including GQRA (and DQRA as appropriate)
- Remedial measures
- Post-remediation monitoring programme
- None of these – my sole role has been to review the final outputs of the work

Signed:

Padraic Mulroy
