RE: Application for a Review of an Industrial Emissions Licence – Starrus Eco Holdings Limited, Ballybeg, Notice under Section 87(1)(a) of the Act of 1992

Dear Sir / Madam,

Starrus Eco holdings Limited is applying to the Environmental Protection Agency (Agency) for a review of the Industrial Emissions Licence for its Composting Installation in Ballybeg, County Tipperary.

It is proposed to extend the existing composting building to facilitate the expansion of the biological treatment capacity and increase the amount of waste accepted annually from 45,000 tonnes to 80,000 tonnes.

The class and nature of the industrial emissions directive activity in accordance with the First Schedule to the Act of 1992, as amended, remain the same:

**11.1. The recovery or disposal of waste in a facility, within the meaning of the Act of 1996, which facility is connected or associated with another activity specified in this Schedule in respect of which a licence or revised licence under Part IV is in force or in respect of which a licence under the said Part is or will be required;**

**11.4 (b) Recovery, or a mix of recovery and disposal, of non-hazardous waste with a capacity exceeding 75 tonnes per day involving one or more of the following activities, (other than activities to which the Urban Waste Water Treatment Regulations 2001 (S.I. No. 254 of 2001) apply):**

**(i) biological treatment; when the only waste treatment activity carried out is anaerobic digestion, the capacity threshold for this activity shall be 100 tonnes per day.**

An Environmental Impact Assessment Report (EIAR) will be submitted to the Agency with the application.

Yours sincerely,

  
Jim O' Callaghan
