Subject: RE: Proposed Technical Amendment by Monaghan County Council

Hi Catriona,

As you may be aware, Monaghan County Council has formally lodged a technical amendment application with the agency to modify the boundary of our licence at Scotch Corner landfill (i.e Ref CR07794)

Our proposal involves amending the licenced boundary to remove the Civic Amenity / MRF from the licenced site. It is proposed that the CA/MRF part of the site will then be authorised via a Waste Facility Permit issued by Monaghan County Council to McElvaney Waste and Recycling.

As a local authority we acknowledge that we cannot have 2 authorisations on a site simultaneously and equally we also acknowledge that such a waste facility cannot operate without having an appropriate waste authorisation in place.

To avoid such a scenario, we are proposing that any Waste Facility Permit granted by Monaghan County Council for the facility only comes into force on the day that the technical amendment is granted.

In this regard we would be hoping to work closely with the Agency to achieve such an outcome.

To assist us with this, we would greatly appreciate if we could liaise and work closely with the licensing inspector handling the technical amendment with a view to potentially discussing a timeline or milestones in relation to the granting of the technical amendment to ensure that we have a valid and appropriate waste authorisation for the facility at all times.

Regards
