Mr. Martin O'Looney
On behalf of Woodville Pig Farms Limited

12 October 2021

Reg. No.: P0467-03

Further Notice under the EPA (Industrial Emissions) (Licensing) Regulations 2013, in respect of a licence review from Woodville Pig Farms Limited for an installation located at Woodville and Ballyknockane, Ballymackey, Nenagh, County Tipperary.

Dear Mr. O'Looney,

I refer to the EPA's notice of 20th August 2021 requesting information in respect of your licence review application and your partial response of 17th September 2021. The reasons for the delay in submission of a full response are noted.

Please note the following:

1. Maiden gilts are considered production pigs for the purposes of IE licensing.
2. It is permissible to exclude odour and ammonia emission reduction measures in modelling of the emissions from existing and proposed external slurry storage tanks so as to present a worst case scenario, however you must include the emissions of all existing and proposed storage structures in the modelling and this will not in any way negate the necessity of all existing and proposed external slurry storage structures being fully compliant with BAT. Updated guidance on the modelling of odour emissions from intensive agricultural installations shall be published by the EPA in the coming weeks and if desired, this may be consulted prior to submitting the finalised modelling report.
3. The resubmitted modelling report should be prepared with reference to the *Air Dispersion Modelling from Industrial Installations Guidance Note (AG4)* regarding its format and content

It should be noted that failure to comply with this request may result in the EPA activating Regulation 19 of the EPA (Industrial Emissions)(Licensing) Regulation 2013 which pertains to Withdrawal or Abandonment of application for a licence.

Your prompt attention to this matter is requested.

Yours faithfully,

A handwritten signature in cursive script that reads "Philip Stack".
