Reason for applying for a licence review

It is proposed to increase the annual waste intake from 250,000 to 450,000. The development is required to accommodate the increasing amount of waste arising in the Eastern Midlands Region and to allow SEHL to increase its recycling and recovery capacity in support of circular economy initiatives it has already implemented and that are in the development stages.

The increased intake does not require either new buildings, or extensions to existing ones and does not involve any changes to the layout of external areas and drainage systems. The proposed development requires planning permission and a review of the EPA licence. A Strategic Infrastructure Development application has been submitted to An Bord Pleanála.
