

EPA Application Form

4. Activity and Capacity

4.3.2 - Storage of Waste – Waste Acceptance Procedure - Attachment

Organisation Name: *

Starrus Eco Holdings Limited

Application I.D.: *

LA007361

For inspection purposes only.
Consent of copyright owner required for any other use.

SEHL has prepared documented waste acceptance procedures. Wastes are delivered by waste collectors that have up to date Waste Collection Permits. Wastes are not accepted from members of the public.

As required by Condition 8.2 of the current licence, waste is only accepted from known waste producers or new waste producers subject to initial waste profiling and waste characterisation off-site.

The written records of this off-site waste profiling and characterisation, where completed, are retained for all active waste producers and for a two year period following termination of licensee/waste producer agreements.

All deliveries arrive in fully covered containers/vehicles that are weighed in at the weighbridge and the accompanying documentation is checked. The driver is then directed to the waste intake areas in the appropriate building.

The wastes are off-loaded in a designated tipping area and inspected for unsuitable material. If any is identified, it is removed to a dedicated quarantine area, where it is stored before being sent off-site.
