The storage capacity calculations is based on the size of the site, the storage space available inside and outside. SEHL has prepared a Waste Storage Plan for the current operations that follows the guidance in the UK Environment Agency Reducing fire risk at sites storing combustible materials: Technical Guidance Note 7.01 (2013). The Plan identifies the storage locations, method of storage, maximum stockpile heights, maximum stockpile areas, freeboard requirements, storage durations, the maximum amount of waste on site at any one time and a designated fire quarantine area.
