#### **Storm Water Discharge Points**

Storm water is rain water run-off from roof and non-process areas

Complete the table below for all storm water discharge points – (one row per discharge point).

Note: This section is <u>NOT</u> for rain water run-off from areas used for the <u>outdoor storage of waste</u> OR <u>run-off from process areas likely to be contaminated</u>. (Process effluent discharges and emissions should be described in the **7.2 Emissions to Water** tab of the application form).

#### Storm Water Trigger Levels and Monitoring

#### Please refer to Section 8.3.1.1 and Appendix 4 of the EIAR included as Attachment 6.2.19 of this application

Complete the table below with details of the trigger levels and proposed monitoring regime for each parameter.

Select parameters that are a good indicator of loss of containment on-site. Consult the EPA guidance in the setting of trigger values for storm water discharges to off-site surface wastes at EPA licensed facilities (2012).

(If different parameters or monitoring arrangements apply at different storm water discharge points include information on this within the table).
