Recommendation

Based on your responses to the forgoing questions the recommended option is for you to submit a 'Licence Review' application for this proposed alteration.

To progress this request you are required to go to the EPA website (www.epa.ie), complete the relevant Licence Application Form and follow the licensing application process. The application should be submitted to the EPA as specified in the licence application form or any associated instructions for applicants.

Proposed Alteration Description

Proposal to increase the waste acceptance in 2021 from 120,000 tonnes per annum to 140,000 tonnes per annum. This proposal will not result in any significant material change to the current IED Licence.

This request is being sought due to the current capacity issues in Ireland during the calendar year 2021. The Drehid Facility will have reached its Waste Acceptance capacity within the next four weeks and have already commenced restriction of access to certain customers and this will continue over the coming weeks as our remaining capacity is exhausted. The Drehid Facility will be forced to cease Waste Acceptance by the end of October.

The main reasons for the shortfall this year appear to be:

- Increasing waste volumes in the last few months
- Difficulties with Greyhound's export of SRF to Sweden
- Lower demand from WtE plants in Europe
- Delays in decision for licence P0030-06
- Restricted access in Irish WtE plants in 2021 due to downtime
