**Re: P1069-01 IE Licence Application Connolly's RED MILLS**

---

Dear Ms. McDonnell,

We are writing further to your telephone conversation on the 16<sup>th</sup> December with Ms. Klara Kovacic of Malone O'Regan (MOR) Environmental, who are acting on behalf of Connolly's RED MILLS, and the recent correspondence we received from the Agency dated the 16<sup>th</sup> December 2021. We also noted the Inspector's Memorandum dated the 10<sup>th</sup> December 2021 that is now available on the EPA website.

We have legitimate questions about the recent EPA correspondence. Therefore, Connolly's RED MILLS and MOR would greatly appreciate a brief remote meeting via Microsoft Teams/Zoom etc. with the relevant Agency personnel someday next week (commencing 20<sup>th</sup> December) to discuss the Agency's concerns. We would endeavour to work around your schedule next week. We consider such a meeting would benefit all parties specifically given the extremely tight programme specified by the Agency.

We wish to confirm that Connolly's RED MILLS remain fully committed to this Industrial Emissions Licence application (P1069-01) and do not intend to abandon this application.

We look forward to your response.

Yours sincerely,

EUGENE BRENNAN B.Agr.Sc.  
EHS Manager.
