Waste Generated (See **Note i** at the end of this attachment)

Attach evidence that demonstrates, in accordance with Articles 11(3) and 12(1)(h) of the Industrial Emissions Directive (for IE licence applications) and Article 4(1) of the Waste Framework Directive (for all applications), how the waste hierarchy (see **Note ii** at the end of this attachment) has been taken into account in the prevention and management of waste generated at the installation/facility (select Document Type: '**Waste Hierarchy**').

Waste Hierarchy evidence filename: *

Attachment-8-1-1 Waste Hierarchy

Complete the table below in relation to waste generated at the installation or facility

Describe, by completing the table below, the arrangements for the recovery or disposal of solid and liquid wastes generated. Use one row (at least) for each waste generated (*the following are examples: e.g., production waste, office waste, canteen waste, vehicle servicing waste, workshop waste, landfill leachate, liquid waste, yard sweepings, ash*). Where appropriate, attach analysis of the waste (include test methods and Q.C.) and period or periods of generation of the waste.

Note: This table is for waste generated as a result of the licensable and associated activities.

This table **is not** for waste accepted at the installation or facility (these details are required to be included elsewhere (in the Waste Activities Tab (4.3)).

Authorisation Application Form

List of Waste (LoW) Code entry *	Applicant's description of waste generated at the facility or installation *	Estimate or, for a licence review, actual tonnes generated per annum *	Is the waste recovered or disposed on-site or is it dispatched off-site to a waste facility? ^{1*}	Describe the disposal or recovery treatment technique *	Disposal / Recovery Code *
Domestic Type Wastes					
20 01 01 - paper and cardboard 20 01 39 - plastics	Dry Mixed Recyclables (DMR) primarily generated from canteens and offices in each data storage facility	78.4 tonnes	Off site	Recycling / reclamation	R1 or R3
20 01 08 - Biodegradable kitchen and canteen waste	Food / Organic waste generated from canteens in each data storage facility	4.0 tonnes	Off site	Recovery	R3
20 01 38 - wood other than that mentioned in 20 01 37	Wood (pallets) from deliveries	1.0 tonnes	Off site	Recycling	R3
20 01 02 - Glass	Glass generated from canteens in each data storage facility	Very low quantities	Off site	Recycling	R3
08 03 15 – ink sludges other than those mentioned in 08 03 14	Waste Printer Cartridges/Toners generated from office activities	9 (c. 3 printer cartridges per year per data storage facility)	Off site (Vendor Managed)	Handled by Vendor (Recycling and/or Recovery)	Handled by Vendor
Wastes from Maintenance Activities					
15 02 03 - Absorbents, filter materials, wiping cloths and protective materials other than those mentioned in 15 02 02*	Filters and other Media including: <ul style="list-style-type: none"> • Air Filters • Evaporative Media 	c. 0.5 tonnes – handled by Vendor	Off site (Vendor Managed)	Recycling or Disposal	R1, R3 or R5

¹ Options: 'On-site' or 'Off-site'

List of Waste (LoW) Code entry *	Applicant's description of waste generated at the facility or installation *	Estimate or, for a licence review, actual tonnes generated per annum *	Is the waste recovered or disposed on-site or is it dispatched off-site to a waste facility? ^{1*}	Describe the disposal or recovery treatment technique *	Disposal / Recovery Code *
20 01 35	Broken Office Equipment (with no other life)	0.125 tonnes	Off site	Metal recycling/reclamation	R4
16 06 04	alkaline batteries (except 16 06 0316 06 04)	16kg	Off-site	Metal recycling/reclamation	R4

The following should be provided where appropriate:

1. Analysis of the waste (include test methods and Q.C.)
2. Its location of storage and the manner by which the integrity/impermeability of storage areas is maintained
3. Period or periods of generation of the waste.

Animal By-Products

Complete this table for any *animal by-products generated* whether classified as waste or not.

Not Applicable

Description of material	Estimate <u>or</u> for licence reviews, actual tonnes generated per annum	Is the animal by-product used on-site <u>or</u> is it dispatched off-site to another facility? ²	Describe the disposal or recovery treatment technique	Disposal / Recovery Code	Describe off-site uses (where applicable)

*For inspection purposes only.
Consent of copyright owner required for any other use.*

*add rows to the table as necessary

² Options: 'On-site' or 'Off-site' or 'not classified as waste'.

Authorisation Application Form

Note i **Waste Generated**

This part of the form collects data and information on the management of waste generated at the facility or installation. (Do not repeat information already provided in Tab 4 on Waste Activities, where applicable).

Waste must be managed without endangering human health and harming the environment, and in particular without risk to water, air, soil, plants or animals, without causing a nuisance through noise or odours, and without adversely affecting the countryside or places of special interest. Measures must be taken to ensure that waste generation is avoided in accordance with the waste hierarchy in Council Directive 98/2008/EC on waste and section 21A of the Waste Management Act 1996, as amended. Where waste is generated, it must be prepared for re-use, recycled or recovered or, where that is technically and economically impossible, it can be disposed of while avoiding or reducing any impact on the environment (applicants should provide this information in the context of the Waste Management Act 1996 as amended).

Note ii **Waste Hierarchy**

Describe what measures will be taken to prevent the generation of waste to the extent possible. State whether the operator of the installation or facility has participated in any projects under the National Waste Prevention Programme.

Where waste is generated at the installation or facility, describe how it will be, in order of priority in accordance with section 21A of the Waste Management Act 1996, as amended, prepared for re-use, recycling, recovery or where that is not technically or economically possible, disposed of in a manner which will prevent or minimise any impact on the environment.

Section 29(2A) of the Waste Management Act 1996, as amended states that it shall be the duty of waste producers and holders to ensure that waste undergoes recovery operations in accordance with sections 21A and 32(1) of the Acts.

For waste whose generation cannot be prevented, describe what measures will be in place to ensure that waste is collected separately (if technically, environmentally and economically practicable) and will not be mixed with other waste or other material with different properties.
