- 20.8 The provisions of the Arbitration Acts 1954 to 2010 and any amendments thereto shall apply to the arbitration.
- 20.9 Performance of obligations under this Licence shall continue during any dispute resolution procedure pursuant to this clause 20.
- 20.10 Nothing in this clause 20 prevents either party from seeking urgent declaratory injunctive or other interlocutory relief.

Irish Water– Foreshore Application for works on the foreshore in Cork Harbour as part of the Cork Lower Harbour Main Drainage Scheme (FS006470)

Background

In May 2015 Irish Water submitted an application for a Foreshore Licence to facilitate proposed works on the foreshore in Cork Harbour, as part of the Cork Lower Harbour Main Drainage Project.

The Cork Lower Harbour Main Drainage Project is a project for the provision of collection systems and wastewater treatment facilities in the Cork Lower Harbour area. The Project includes the population/industrial centres of Cobh, Carrigaline (including Crosshaven), Passage West/Monkstown (including Glenbrook) and Ringaskiddy (including Shanbally and Coolmore).

The existing sewer network serving the Lower Cork Harbour area comprises mainly combined sewer systems. Wastewater from Cobh, Carrigaline, Passage West/Monkstown and Ringaskiddy is currently discharged untreated into the Harbour. As part of the project the wastewater from these population centres will, following upgrading of the sewerage network including pump stations and outfalls, be forwarded for treatment at a new Wastewater Treatment Plant located at Shanbally. The treated effluent will be then discharged via the existing long sea outfall close to Dog Nose Point in Cork Harbour.

Combined sewer overflows will be located in the collection system at individual pumping stations to prevent localised flooding in the event of a peak rainfall event. The provision of duty/standby pumping arrangements in each pumping station will minimise the potential for the discharge of raw sewage except in the event of a power outage (in which case the discharge will be screened before entering the waterbody). In this event the pumping stations will, at a minimum, incorporate facilities to allow the connection of standby generators.

The proposed works on the foreshore will include:

1. Proposed structures to act as combined sewer overflows (CSO) as part of the collection network;
2. Proposed structures to act as surface water outfalls (SWO) for catchment drainage

As a result of the proposed works, a number of existing structures within the foreshore area will no longer convey any flows and as such will become redundant.

This application covers requests for consent for 10 Combined Sewer Overflows, 4 Surface Water Outfalls, the making redundant of 2 outfall structures and the upgrading of a Culvert with a Sewer Crossing.

The location of the proposed discharge locations are shown in Drawing No 20506-FL-300, “Proposed Sewerage Outfall Locations” and Drawing No 20506-FL-302, “Existing IDA Outfall Discharge Pipeline”

Details of the individual CSOs and SWOs are given in the following Table

Public Consultation

A public notice concerning this application was published in the “Irish Examiner” on 25/6/2015 and 27/6/2015, in the “Southern Star” on 27/6/2015 and in the “Irish Skipper” and “Marine Times” in July 2015. The public display documents were made available for inspection at Cobh, Togher and Anglesea Street Garda Stations in Cork for the required period of 8 weeks. The application documents were also available on the Department’s Web site.

No submissions were received on foot of the public consultation.

State Bodies Consultation:

Observations on the project were received from DECLG (Water Services Advisor), The Development Applications Unit of Department of Arts, Heritage and the Gaeltacht, (Nature Conservation and Underwater Archaeology), Department of Agriculture, Food and the Marine, (Aquaculture and Foreshore Management Division), Department of Defence, Marine Institute, Inland Fisheries Ireland, Sea Fisheries Protection Authority, Marine Survey Office, Met Eireann, Cork County Council, Commissioners of Irish Lights, Environmental Protection Agency, Bord Iascaigh Mhara

There were no objections to the proposed works on the foreshore. DECLG Water Advisor, however, noted that, on the basis of a site inspection a number of the proposed CSO and SWO structures are in a poor condition and are in need of structural upgrading.

MLVC Considerations

The following documents were considered:

- Completed Foreshore Licence Application Form
- Environmental Impact Statement, prepared by Mott MacDonald Pettit, dated February 2008
- Appropriate Assessment Screening - Cork Lower Harbour Main Drainage Project Outfall Upgrade & Repair Works, prepared by Moore Group, dated 20th May, 2015
- Observations from Prescribed bodies

MLVC Conclusions

A major objective of the overall project is the discontinuation of untreated foul flow into the lower Cork Harbour area, with the wastewater now to be treated at the new Wastewater Treatment Plant at Shanbally. It is considered that the proposed works will result

in a significant reduction in spills of untreated sewage into Cork Harbour and contribute to an improvement in water quality in the area.

On the basis of the above and considering the nature, scale, and location of the proposed works it is concluded that, subject to compliance with the specific conditions set out below, the proposed works would not have a significant negative impact on navigation, fishing or the marine environment, would not impact on other legitimate uses or users of the foreshore area in question and would not have a significant effect on the Qualifying Interests of any Natura 2000 site. It is recommended, therefore, that a licence be issued in respect of the following:

Location	Application reference	Drawing No.	Proposed use
Passage West - Ardmore	SW-004 Pass “Ardmore Overflow”	20506-FL-101 and 20506-FL-102 dated 23/11/15	CSO for Cork Road Pumping Station
Glenbrook - Lackaroe	SW-006 Pass “Glenbrook Overflow”	20506-FL-111 and 20506-FL-112 dated 06/05/15	Upgrading works required at Glenbrook Pumping Station. CSO. Works on seawall required.
Monkstown	SW-007 Pass “Sand Quay Overflow”	20506-FL-116 and 20506-FL-117 dated 06/05/15	CSO for Monkstown Pumping Station
Monkstown	PO-1 “Bayview Cottages Overflow”	20506-FL-118 and 20506-FL-119 dated 06/05/15	CSO for Coast Road Pumping Station
Carrigaline – Carrigaline Middle	SW-010 Ring “Old Waterpark Overflow”	20506-FL-124 and 20506-FL-125 dated 06/05/15	CSO for Old Waterpark Pumping Station
Carrigaline - Kilnaglery	SW-011 Ring “Crosshaven Road Overflow”	20506-FL-126 and 20506-FL-127 dated 06/05/15	CSO for Crosshaven Road Pumping Station
Carrigaline – Carrigaline Middle	R -02 “Old Waterpark Sewer”	20506-FL-130, 20506-FL-131	Structure will convey flows from Carrigaline Town Centre to Old Waterpark Pumping Station

It is noted, however, that a number of the proposed CSOs and SWOs structures are in a poor condition and in need of structural upgrading. These include

- Ardmore Overflow, SW004-Pass, Drg. no.20506-FL-101 and 20506-FL-102 23/11/15;
- Glenbrook Overflow, SW006-Pass, Drg. no. 20506-FL-111 and 20506-FL-112 06/05/15;
- Sand Quay Overflow, SW007-Pass, Drg. no. 20506-FL-116 and 20506-FL-117 06/05/15;
- Bayview Cottages Overflow, P-01, Drg. no. 20506-FL-118 and 20506-FL-119 06/05/15;

It is considered appropriate, therefore, to recommend that consent be granted for the use of these structures subject to the Licensee commissioning upgraded structures at these locations within an agreed time period e.g. 3 years.

Irish Water– Foreshore Application for works on the foreshore in Cork Harbour as part of the Cork Lower Harbour Main Drainage Scheme - Cobh (FS006657)

Background

In August 2016 Irish Water submitted an application for a Foreshore Licence to facilitate proposed works on the foreshore in Cork Harbour, as part of the Cork Lower Harbour Main Drainage Project.

The Cork Lower Harbour Main Drainage Project is a project for the provision of collection systems and wastewater treatment facilities in the Cork Lower Harbour area. The Project includes the population/industrial centres of Cobh, Carrigaline (including Crosshaven), Passage West/Monkstown (including Glenbrook) and Ringaskiddy (including Shanbally and Coolmore).

The existing sewer network serving the Lower Cork Harbour area comprises mainly combined sewer systems. Wastewater from Cobh, Carrigaline, Passage West/Monkstown and Ringaskiddy is currently discharged untreated into the Harbour. As part of the project the wastewater from these population centres will, following upgrading of the sewerage network including pump stations and outfalls, be forwarded for treatment at a new Wastewater Treatment Plant located at Shanbally. The treated effluent will be then discharged via the existing long sea outfall close to Dog Nose Point in Cork Harbour.

Combined sewer overflows will be located in the collection system at individual pumping stations to prevent localised flooding in the event of a peak rainfall event. The provision of duty/standby pumping arrangements in each pumping station will minimise the potential for the discharge of raw sewage except in the event of a power outage (in which case the discharge will be screened before entering the waterbody). In this event the pumping stations will, at a minimum, incorporate facilities to allow the connection of standby generators.

This application is for the Cobh element of the overall project and includes:

- An estuary crossing consisting of 2 pumped rising mains between Cobh and Monkstown. It is proposed that these will be constructed using Horizontal Directional Drilling under the seabed. The pipeline will be constructed from a launch site in Cork Dockyard to a temporary reception site adjacent to the Glen Road, Monkstown. The pipeline will then be permanently intercepted at an interception manhole at Marine Villas (adjacent to the R610) from where flows will be connected to the Monkstown wastewater network by a gravity wastewater pipeline.
- Installation of 6 No. outfalls to act as combined sewer outfalls (CSO) as part of the collection network. All proposed CSO's will discharge to below the MLWS mark.
- The removal and making redundant of 14 No. existing structure which will no longer convey any flows

A key objective of the proposed works is the discontinuation of the discharge of untreated sewage to the lower harbour area in the vicinity of Cobh with the flows being pumped across the estuary to Monkstown and transferred to the new WWTP at Shanbally for treatment. The CSO's will only discharge during emergency flow conditions and the discharges from these outfalls would be significantly reduced.

The location and details of the proposed works are shown in the following drawings submitted by the applicant:

MLVC Conclusions

A major objective of the overall project is the discontinuation of untreated foul flow into the lower Cork Harbour area, with the wastewater now to be treated at the new Wastewater Treatment Plant at Shanbally. It is considered that the proposed works will result in a significant reduction in spills of untreated sewage into Cork Harbour and contribute to an improvement in water quality in the area.

On the basis of the above and considering the nature, scale, and location of the proposed works it is concluded that, subject to compliance with the specific conditions set out below, the proposed works would not have a significant negative impact on navigation, fishing or the marine environment, would not impact on other legitimate uses or users of the foreshore area in question and would not have a significant effect on the Qualifying Interests of any Natura 2000 site. It is recommended, therefore, that a licence be granted.

Proposed Licence Conditions

1. The Licensee shall use that part of the Foreshore the subject matter of this licence for the purposes as outlined in the application and for no other purposes whatsoever.

2. The Licensee shall notify the Department of Housing, Planning and Local Government at least 14 days in advance of the commencement of the works on the foreshore.
3. The Licensee shall adopt appropriate methods of operation in order to ensure that no spillages of hydrocarbons, cement, or other hazardous substance occur to the Foreshore during the course of the works. Contractor's arrangements for the control of pollutants should be notified to the Department of Housing, Planning and Local Government
4. Method Statements for all construction operations on the foreshore shall be submitted by the Licensee and agreed with the Department of Housing, Planning, and Local Government prior to the commencement of any works.
5. The Licensee shall arrange the publication of a local marine notice. This notice shall give a general description of the operations and the approximate dates of commencement and completion. A notice in a locally read newspaper at least 2 week prior to the commencement of works shall suffice. This notice should be supplemented with a Port Marine Notice issued by the Harbour Authority.
6. Prior to and during the course of the works, the Licensee shall consult and liaise with the Cork Harbour Authority and comply with any direction given by the Harbour Authority
7. During the course of the works the Licensee shall ensure that,
 - (a) All necessary precautions are put in place to protect the public in accordance with relevant Health and Safety Legislation;
 - (b) Existing public access arrangements to the general foreshore area are not impeded by any vessels, plant or materials used in connection with the works
 - (c) Procedures are adopted to ensure that the works are not injurious to fishing, navigation, adjacent lands or the public interests.
8. The Licensee shall ensure that the Mitigation Measures set out in "Report for Appropriate Assessment Screening: Cork Lower Harbour Main Drainage Project Outfall Upgrade and Repair Works", dated June 2016 and "Appropriate Assessment of Cork Lower Harbour Main Drainage Project – Estuary Crossing by Horizontal Directional Drilling", dated April 2016, submitted with the application, are implemented in full.
9. The Licensee shall engage the services of a suitably qualified underwater archaeologist to carry out an Underwater Archaeological Impact Assessment (UAIA) to fully assess the potential impacts of the works on the foreshore. The

UAIA shall be licensed by the Department of Culture, Heritage and Gaeltacht. A detailed method statement shall accompany any such licence application.

10. The Department of Culture, Heritage and Gaeltacht shall be furnished with a report describing the results of the UAIA.
