Mr. Martin O'Looney
Mr. Tim Cullinane
On behalf of Woodville Pig Farms Limited

09 September 2022

Reg. No.: P0467-03

Further Notice under the EPA (Industrial Emissions)(Licensing) Regulations 2013, in respect of a licence review from Woodville Pig Farms Limited for an installation located at Woodville and Ballyknockane, Ballymackey, Nenagh, County Tipperary.

Dear Mr. O'Looney,

After consideration, the EPA will not grant the request to remove the mill areas at Woodville Pig Farms installations from within the licensed boundary for the following reasons:

- Notwithstanding that the mill supplies other customer farmers, feed preparation (milling, mixing and storage) remains an integral part of the licensed activity onsite (as per the Commission Implementing Decision (EU) 2017/302 establishing best available techniques (BAT) conclusions for the intensive rearing of poultry or pigs) and the milling company and pig installation have shared ownership;
- The mill areas can only be accessed via the licensed installation;
- Emissions/discharges or nuisance from the mill areas cannot be isolated from those emanating from the installation; and
- Proposed and/or existing slurry and stormwater infrastructure runs through the mill area.

In light of this, you are therefore required to submit updated site plans for both the Woodville and Ballyknockane sites, retaining the mill areas within the proposed site boundaries.

With a view to advancing this application for determination, the above-mentioned information should be submitted to the EPA within ten days of this notice.

It should be noted that failure to comply with this request may result in the EPA activating Regulation 19 of the EPA (Industrial Emissions)(Licensing) Regulation 2013 which pertains to Withdrawal or Abandonment of application for a licence.

Your prompt attention to this matter is requested.

Yours faithfully,

Philip Stack
