Co. Cork.

26th August 2022

Re: Registration No. P0790-03 – Application to the EPA for Licence Review for Installation at Mogeely Pig Farm, Annistown, Killeagh, Co. Cork.

Dear Eoin,

With reference to the above and the EPA's queries outlined in their letter dated 1st November 2021, we wish to comment as follows to item No. 4b:

We attach Drawing No. 214037-S01 Revision B, with the details / depths of the sluice gates. On completion of the facility, there will be 103 No. sluice gates. The location of these are shown on Pig Manure Drainage Layout Plan Drawing No. 214037-01 Revision E, previously submitted to the EPA.

The proposed pig manure depths are shown on the attached drawing, the maximum depth within the house will be 800mm and a minimum depth at emptying of 500mm.

The slurry will be removed from house via sluice gate to external storage.

Should you have any queries on the above, please do not hesitate to ask.

Yours sincerely,

A handwritten signature in black ink, appearing to read 'Tony Dunlea', is written over a horizontal dashed line.
