Mr. John Durkan
On behalf of Anglo Beef Processors Ireland Unlimited Company

02 November 2022

Reg. No.: P0040-03

Further Notice under the EPA (Industrial Emissions) (Licensing) Regulations 2013, in respect of an Agency Initiated licence review for an installation located at Anglo Beef Processors Ireland Unlimited Company t/a ABP Proteins Waterford, Christendom, Ferrybank, Waterford

Dear Mr. Durkan,

I refer to the EPA's notice of 8th December 2020 requesting information in respect of the Agency Initiated Licence Review and to the reminder letters of 6th January 2022, 16th May, 2022 and 21st September 2022.

I am to advise that in accordance with the provisions of Section 90(7) of the EPA Act 1992 as amended, the following information, requested on 8th December 2020, remains outstanding:

1. Provide the quantity of each type of animal by-products, as set out in the European Waste List established by decision 2000/532/EC, processed on site during 2019 and 2020. (Regulation (9)(2)(i))
2. Provide a letter from ABP Ireland Limited, Waterford, Reg. No P0205-02, confirming that the WWTP is suitably constructed to cater for the anticipated reduction in wastewater volume/increase in emission limit values **(to also include Condensate ELV and Condensate daily flow figure)** and that this will not negatively impact the operation and/or performance of the WWTP. (Regulation (9)(2)(k))
3. Update an assessment of the impact of emissions to air (to include NO_x, SO_x, particulates, NH₃, odour and TVOC) from the installation (incl. main emissions from boilers and thermal oxidiser) supported by an air dispersion model having regard to 'Air Dispersion Modelling from Industrial installations Guidance Note (AG4)' (EPA). Provide evidence that the annual critical level for the protection of vegetation and natural ecosystems for NO_x will not be exceeded. Assess the impact of ammonia and nitrogen deposition and provide evidence that there will be no impacts from ammonia and nitrogen emissions from the installation on European sites. Assess the predicted compliance with the odour standard 1.5 OUE/m³ as a 98th%ile of hourly

averages at the worst-case sensitive receptor, in accordance with the Agency's guidance document AG9. (Regulation (9)(2)(k))

Your response to this request is to be submitted via EDEN. Guidance on how to use this portal is available on the EPA website at [Search Results | Environmental Protection Agency \(epa.ie\)](#).

Field Cod

It should be noted that where there is failure to comply with the above requirements within two weeks of this notice, the EPA may proceed with its consideration of this application in the absence of the information requested.

Your prompt attention to this matter is requested.

Yours faithfully,
