Mr. Jonathan Gauntlett

On behalf of Amazon Data Services Ireland Limited

10th November 2022

Reg. No.: P1170-01

Further Notice under the EPA (Industrial Emissions) (Licensing) Regulations 2013, in respect of a licence application from Amazon Data Services Ireland Limited for an installation located at Amazon Data Services Ireland Limited, Grange Castle South Business Park, Baldonnel Road, Dublin 22, D22 E7C9

Dear Sir or Madam,

I refer to the EPA's notice of 27th October 2022 requesting information in respect of your licence application.

You are advised that there remains outstanding information, as required under the EPA (Industrial Emissions) (Licensing) Regulations 2013, as amended. You are therefore required to submit the following outstanding information as listed in the EPA's notice dated 27th October 2022:

Air Dispersion Modelling Report

2. Revise the Air Dispersion Modelling to include the 3 no. 3 MWth diesel powered back-up generators.

Sewer Emissions

3. It is noted in the application that the proposed monitoring locations for the emissions to sewer are downstream of the foul waste stream mixing with the trade effluent. Please identify a suitable location (SE-1 and SE-2) to monitor the trade effluent as defined in the Water Services Act, 2007.

Evaporative cooling system

4. Provide details on how the public water supply is treated onsite prior to use as an 'evaporative cooling water'.
5. During the winter months it is noted that the evaporative cooling system is drained down every 7-days to prevent legionella growth. Please confirm if the drain down during the winter months will be discharged to sewer or otherwise?

Prevent of Accidents

6. Provide the SOP for the diesel unloading operation at the installation.

With a view to advancing this application for determination, the above-mentioned information should be submitted to the EPA by **17th November 2022**.

Your prompt attention to this matter is requested.

Yours faithfully,

Environmental Licensing Programme
