Licensee Name: Woodville Pig Farms Ltd
EPA Licence No: P0467
Application Reference No: LA004791

Regarding: Unsolicited Additional Information

Dear Sir/Madam

Woodville Pig Farms Ltd would like to submit a revision of drawing number A3_3146 dated 13th October 2022.

House number 2B was incorrectly labelled as House 2A in the submitted drawing. Please find attached the revised drawing A3_3146_A dated 12th January 2023, which has corrected this error.

We would confirm that the proposed mitigation measures and emission details for House 2B are correct, as included in the report titled *Odour Impact Assessment of a Proposed Expansion of Existing Woodville Pig Farm Ltd (Ver 6)* by Odour Monitoring Ireland Ltd, however, the flooring type was incorrectly labelled.

The Odour Management Plan has also been revised (Ver 8) to correct this typo, and to provide additional clarity on the source of previously referenced ammonia emission rates for weaners.

Table 2.2 has been updated to include the emission factor for IC-V⁺ system using vacuum frequent slurry removal (BAT Reference: Table 4.94 – Section 4.7.4.2, page 424) of 0.5 kgNH₃/pig place/ year. This would be the case for houses 13, 14, and 15. The emission factor for IC-

V⁺ system using flushing for frequent slurry removal (BAT Reference: Table 4.94 – Section 4.7.4.9, page 424) remains 0.21 kgNH₃ /pig place/ year. This would be the case for house 2B.

We hope that this additional information provides beneficial clarification on the application documents previously submitted.

Please do not hesitate to get in contact should you have any queries.

Yours faithfully
