The previously submitted drawings, dated March 2022, are no longer valid and have been replaced by the new drawings submitted dated March 2023. The updated drawings include the redline boundary for the area covered by the IE license, which has been reduced from 7.9 hectares (ha) to a total site area of 6.99 ha. This change was made as a result of a lease arrangement verification with Pargo Properties Limited.

It's important to note that while the boundary has changed, there have been no material changes to the application documentation or the environmental impact assessments associated with the license activity.
