1.0 Introduction

Below is an outline of the technical knowledge of the staff at Milltown Composting Systems Ltd.

2.0 Technical Knowledge

Facility Manager

Neil has over 20 years experience working in the composting industry. He started his composting career as an assistant facility manager at a green waste composting site for a contractor working for Dublin County Council and was also involved in setting up a straw composting project at Kildangan horse stud farm in Monasterevin, Co. Kildare. He is currently the facility manager at Milltown Composting where he has worked for the past 17 years. As well as significant experience gained through working in the industry Neil has completed a number of courses on composting and site management, including; FETAC Certificate Course in Waste Facility Operations, Level 5 and the Cre Certificate in Composting operation. Neil has significant experience in the management and day to day operation of composting facilities and has experience in liaising with regulators including the Local Authority and the EPA.

Site Operatives

The Milltown Composting facility has five permanent operators

- Eamonn Cremin – 11 years experience
- John O'Donnell – 5 years experience
- John Slattery – 1.5 years experience
- Constantin Futura – 3 years' experience

The Milltown Composting facility has three-part time operators that are used as needed

- David Smith - Certificate in Compost Facility Operation awarded by CRE/Sligo IT (2015)
- Patrick Smith
- Philip Lonergan

All above permanent and temporary operators are briefed regularly by the facility manager on the requirements of the waste licence, all also hold Certificate's in Teleporter safety and operations, and Manual Handling.
